## **SCHOOL OF ENGINEERING SCIENCES AND TECHNOLOGY**

**Vision Statement (School Level):** To become the best institution in the national and international map in terms of quality of teaching and research, technical knowledge and academics in the field Computer Science & Engineering, Electronics & Communication Engineering, Bioinformatics with sincere honesty adding values in the core aspect of students' life.

### **Mission Statements (3 to 4) (School Level):**

**MS1:** To offer state-of-the-art undergraduate, postgraduate and doctoral programs in Computer Science & Engineering, Electronics and Communication Engineering & Engineering and Bioinformatics.

**MS 2:** To provide one of the best working environments to motivate faculty and students to work towards vision of the Department.

**MS 3:** To develop association with industry, other Universities/Institute/Research Laboratories and work in collaboration with them.

**MS 4:** To use our expertise in all the relevant disciplines for helping society in solving its real life problem.

**MS 5:** To develop entrepreneurship skills in the students so that they can become problem solver and innovative developer and contribute to the society by providing employment to others.

## **DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING**

**Vision Statement (Department/Centre Level):** To become the best institution in the national and international map in terms of quality of teaching and research, technical knowledge and academics in the field Computer Science & Engineering, Electronics & Communication Engineering, Bioinformatics with sincere honesty adding values in the core aspect of students' life.

### **Mission Statements (3 to 4) (Department/Centre Level):**

**MS1:** To offer state-of-the-art undergraduate, postgraduate and doctoral programs in Computer Science & Engineering, Electronics and Communication Engineering & Engineering and Bioinformatics.

**MS 2:** To provide one of the best working environments to motivate faculty and students to work towards vision of the Department.

**MS 3:** To develop association with industry, other Universities/Institute/Research Laboratories and work in collaboration with them.

**MS 4:** To use our expertise in all the relevant disciplines for helping society in solving its real life problem.

**MS 5:** To develop entrepreneurship skills in the students so that they can become problem solver and innovative developer and contribute to the society by providing employment to others.

### **PROGRAM EDUCATIONAL OBJECTIVES (PEOs)**

**Upon the completion of Academic Programme (MCA), students will be able -**

**PEO-1 :** To establish technical and profesional foundation that yield the students to go for higher studies in the field of Computer Science application, especially concerning with the recent trends in technology.

**PEO-2:** To design software products required for many daily life solutions by utilizing their education in computer science and applications.

**PEO-3:** To work as a professionals in the capacity of team members / leaders in professional environment.

**PEO-4:** To analyze recent trends in innovation and technology and accordingly can apply their knowledge for providing related services.

### **Mapping Program Educational Objectives (PEOs) with Mission Statements (MS)**

	<b>MS-1</b>	<b>MS-2</b>	<b>MS-3</b>	<b>MS-4</b>	<b>MS-5</b>
<b>PEO-1</b>	3	2	2	2	2
<b>PEO-2</b>	2	2	3	3	3
<b>PEO-3</b>	2	2	2	3	3
<b>PEO-4</b>	2	2	3	2	3

Write '3' in the box for 'high-level' mapping, 2 for 'Medium-level' mapping, 1 for 'Low-level' mapping.

## Program Outcomes (PO):

**PO1) Computational Knowledge:** Apply knowledge of computing fundamentals and domain knowledge.

**PO2) Problem Analysis:** Identify, formulate, and solve complex computing problems reaching substantiated conclusions.

**PO3) Development of Solutions:** Design and evaluate solutions for complex computing problems with appropriate consideration.

**PO4) Investigations of complex Computing problems:** Use research-based knowledge and research methods for analysis and interpretation of data, and synthesis of the information to provide valid conclusions

**PO5) Modern Tool Usage:** Create, identify, and apply appropriate techniques, resources, and modern computing tools to complex computing activities.

**PO6) Professional Ethics:** Understand and commit to professional ethics and cyber regulations for professional computing practices.

**PO7) Life-long Learning:** Identify the need and have the ability, to engage in independent learning as a computing professional.

**PO8) Project management and finance:** Understand and apply computing, management principles to manage multidisciplinary projects

**PO9) Communication Efficacy:** Communicate effectively with the computing community, and with society.

**PO10) Societal and Environmental Concern:** Understand and assess societal, environmental, health, safety, legal, and cultural issues

**PO11) Individual and Teamwork:** Function effectively in diverse teams and in multidisciplinary environments.

**PO12) Innovation and Entrepreneurship:** Identify a timely opportunity and using innovation to pursue that opportunity.

	<b>PEO-1</b>	<b>PEO-2</b>	<b>PEO-3</b>	<b>PEO-4</b>
<b>PO-1</b>	3	3	2	2
<b>PO-2</b>	3	3	1	2
<b>PO-3</b>	3	2	2	2
<b>PO-4</b>	2	3	2	3
<b>PO-5</b>	3	2	2	3
<b>PO-6</b>	2	3	3	1
<b>PO-7</b>	2	3	3	2
<b>PO-8</b>	2	3	2	3
<b>PO-9</b>	1	2	3	2
<b>PO-10</b>	2	2	1	2
<b>PO-11</b>	2	2	3	2
<b>PO-12</b>	1	2	2	3

**ADMISSION & EXAMINATION RULES**  
*for*  
**Master of Computer Applications**

**1. THE PROGRAM**

Highlights of the course are described in the following table:

a.	<i>Name of the Program</i>	Master of Computer Applications
b.	<i>Nature</i>	Regular and Full Time
c.	<i>Duration</i>	Two years (4 Semesters)
d.	<i>Total number of credits</i>	100
e.	<i>Medium of Instruction and English Examinations</i>	English
f.	<i>Eligibility Criteria</i>	i. Passed BCA/ BSc/ B. Com/ BA with mathematics at 10 + 2 level or at graduation level examination from a recognized institution/university securing at least 50% marks (or equivalent CGPA) in the qualifying examination.
g.	<i>Selection procedure</i>	As per the merit of the qualifying examination.
h.	<i>Total Seats</i>	60
i.	<i>Period of Completion</i>	Not more than 04 years (8 Semesters)
j.	<i>Commencement of the Program</i>	July of the every academic session

## 2. PROGRAMME STRUCTURE

Semester-wise course structure, guidelines for teaching, practical and associated assessment of **MCA programme** is described in the following tables:

<b>Course Type</b>	<b>Abbreviation</b>	<b>Credits</b>
Program Core Course	PCC	44
Program Elective	PE	12
Open Elective	OE	04
Foundation Course	FC	04
Ability Enhancement Course	AEC	02
Skill Enhancement Elective	SEE	04
Laboratory	LAB	12
Dissertation	DISS	18
<b>Total Credits</b>		<b>100</b>

L-T-P stands for number of contact hours as Lecture-Tutorial-Practical in a week.

**Semester – I**

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA 101	Object oriented programming	PCC	25	75	100	3-1-0	4
MCA 102	Computer Organization and Architecture	PCC	25	75	100	3-1-0	4
MCA 103	Database Management Systems	PCC	25	75	100	3-1-0	4
MCA 104	Software Engineering	PCC	25	75	100	3-1-0	4
MCA 105	Data Communication and Computer Networks	PCC	25	75	100	3-1-0	4
MCA 106	Communication Skills	AEC	25	75	100	2-0-0	2
MCA 107	'OO Programming Lab	LAB	25	75	100	0-0-4	2
MCA 108	Database Management Systems Lab	LAB	25	75	100	0-0-4	2
<b>Total</b>						<b>17-5-8</b>	<b>26</b>

**Semester – II**

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA 201	Mathematical Foundations for Computer Applications	FC	25	75	100	3-1-0	4
MCA 202	Data Structures and algorithms	PCC	25	75	100	3-1-0	4
MCA 203	Java Programming	PCC	25	75	100	3-1-0	4
MCA 204	Operating Systems	PCC	25	75	100	3-1-0	4
	PE – 1	PE	25	75	100	3-1-0	4
	PE-2	PE	25	75	100	3-1-0	4
MCA 205	Data Structures Lab	LAB	25	75	100	0-0-4	2
MCA 206	Java Programming Lab	LAB	25	75	100	0-0-4	2
<b>Total</b>						<b>18-6-8</b>	<b>28</b>

**Semester – III**

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA 301	Formal languages and Compiler Design	PCC	25	75	100	3-1-0	4
MCA 302	Machine Learning	PCC	25	75	100	3-1-0	4
MCA 303	Data Warehousing and Data Mining	PCC	25	75	100	3-1-0	4
	PE – 3	PE	25	75	100	3-1-0	4
	SEE	SEE	25	75	100	3-1-0	4
	OE	OE	25	75	100	3-1-0	4
MCA 304	ML Lab	LAB	25	75	100	0-0-4	2
MCA 305	Lab based on SEE	LAB	25	75	100	0-0-4	2
<b>Total</b>						<b>18-6-8</b>	<b>28</b>

**Semester – IV**

<b>Course Code</b>	<b>Course Title</b>	<b>Course Type</b>	<b>Marks</b>			<b>L-T-P</b>	<b>Credits</b>
			<b>Internal Assessment</b>	<b>Viva Voce</b>	<b>Total</b>		
MCA 401	Dissertation/Industrial Project	DISS	300	200	500	0-0-36	18

**Grand Total of Credits = 100**

### PROGRAM ELECTIVES (PE)

PE – 1	
MCA PE111	Artificial Intelligence
MCA PE112	Web technology
MCA PE113	Software testing and Quality Assurance
PE – 2	
MCA PE221	Data Science and Analytics
MCA PE222	Soft Computing
MCA PE223	Neural Networks and Deep Learning
PE – 3	
MCA PE331	Distributed Systems
MCA PE332	Cloud Computing
MCA PE333	Cryptography and Network Security
MCA PE334	MOOCS*

\*The list of online courses to be cleared through MOOCS shall be floated in the respective semester after the approval from Board of Studies with in-house examination being conducted.

### Skill Enhancement Electives (SEE)

SEE	
MCA SEE311	Android Programming
MCA SEE312	Linux and Unix Programming
MCA SEE313	ASP.net Programming

### OPEN ELECTIVES (OE)

OE	
MCA OE311	E-Governance and Smart City
MCA OE312	Cyber physical system and IoT
MCA OE313	Sustainable Development and Green Computing

### 3. MODE OF CURRICULUM DELIVERY

Mode of curriculum delivery includes classroom teaching, assignments, test, lab work, presentations, participation in relevant events and regularity.

### 4. ATTENDANCE

- a. All students are supposed to attend every lecture and practical classes. However, the attendance requirement for appearing in the examination shall be a minimum of 75% of the classes held.
- b. Each one-period teaching shall account for one attendance unit.
- c. The concerned teacher will take a roll call in every scheduled class, maintains and consolidate the attendance record, which would be submitted to the Head of the Department at the conclusion of the semester.

- d. Attendance on account of participation (with prior permission from the Head of the Department) in the co-curricular/extra-curricular activities can be granted by the Dean on receipt of certificates or recommendations of the respective activity issued by the Head of the Department.
- e. Attendance records displayed on the Notice Board from time to time, in respect of short attendance, shall be deemed to be a proper notification and no individual notice shall be sent to the students/local guardian.
- f. In case a student is found to be continuously absent from the classes without information for a period of 30 days, the concerned teacher shall report it to the Head of the Department.
- g. Head of the Department may recommend for striking off the name of a student from rolls, after ensuring 'one month continuous absence', from all the concerned teachers.
- h. A student, whose name has been struck off on account of long absence may apply to the Dean for readmission within 15 days of the notice of striking off the name. The readmission shall be effected on payments of prescribed readmission fees.
- i. A student with less than 75% attendance in a subject shall not be allowed to appear in that subject in the semester examination. The Head of the Department shall recommend all such cases to the Dean of the School.
- j. The Dean, on the recommendation of the Head of the Department, may consider the relaxation of attendance up to 10% on account of sickness and /or any other valid reason. No application for relaxation of attendance (duly certified by a Registered Medical Practitioner/Public hospital or a competent authority) will be entertained after 15 days from the recovery from illness etc.

## 5. INTERNAL ASSESSMENT

- a. Internal assessment, to be made by concerned teachers, will be based on minor tests, quizzes, presentation, programming test, demonstrations and assignments.
- b. There will be three (3) Internal Assessment (Unit Tests) with a total of 20 marks, and the best two (2) performances out of the three Unit tests of Internal Assessment will be counted. Other modes of assessment shall account for remaining 5 marks.
- c. Dates for unit test will be announced at the beginning of the semester, by the examination coordinator.
- d. The teacher concerned shall maintain a regular record of the marks obtained by students in unit tests and display the same in due course.
- e. The concerned teachers shall submit the compiled internal assessment marks to the Head of the Department, on the conclusion of teaching of the current semester.
- f. The Head shall display a copy of the compiled sheet, of internal assessment marks of all the papers, before forwarding it to the Controller of Examination, i.e. at the conclusion of the semester.

- g. A promoted candidate, who has to reappear in the examination of a paper, will retain internal assessment marks.
- h. In the case of re-admission, the candidates shall have to go through the internal assessment process afresh and shall retain nothing of the previous year.

## 6. SEMESTER EXAMINATIONS

Prescriptions for conducting semester examinations of theory and lab papers, those shall be conducted after the conclusion of each of the semesters, are presented in the following table:

S.N.	Classification	Theory	Lab
1.	Mode	Written Only	Written, Demo, Programming and viva- voce etc.
2.	Duration	03 Hours	04 Hours
3.	Total Marks	75 (Seventy Five Only)	75 (Seventy Five Only)

## 7. DISSERTATION/INDUSTRIAL PROJECT

- a. Each student of the final semester will have to go for a Dissertation/Industrial Project work either in the industry or in the Department under the guidance of one or two faculty members.
- b. Period of completion of Dissertation/Industrial Project work shall be full one semester.
- c. There shall normally be two supervisors-one internal and one *external (in the case of industry project form the place where the student is pursuing project-work)*.
- d. All the students, who are pursuing the Dissertation/Industrial project work, shall be continuously in touch with the internal supervisor.
- e. **There shall be a mid-term evaluation of the progress** and the internal supervisors will conduct it. However, an internal supervisor may ask the student to submit a confidential progress-report from the external supervisor (*in the case of industry project*).
- f. All the candidates shall submit **Three (03)** hard copies of the project reports that are duly approved and signed by internal as well as external (*if applicable*) supervisors.
- g. An external examiner, appointed for the purpose, shall evaluate the project report.

- h. The Head of the Department shall fix a date and time for viva-voce examinations, on receipt of the evaluation-report of the project reports from the external examiner.
- i. Head of the Department shall forward the compiled total marks (awarded in internal assessment, project Report and Viva-voce Examination), in the project-semester of each of the candidate, to the Controller of Examination.

## 8. EXAMINATION

- a. The performance of a student in a semester shall be evaluated through continuous class assessment and end semester examination. The continuous assessment shall be based on class tests, assignments/ tutorials, quizzes/ viva voce and attendance. The end semester examination shall be comprised of written papers, practical and viva voce, inspection of certified course work in classes and laboratories, project work, design reports or by means of any combination of these methods.
- b. The marks obtained in a subject shall consist of marks allotted in end semester theory paper, practical examination and sessional work.
- c. The minimum pass marks in each subject including sessional marks (Theory, Practical or Project etc.) shall be 40%.

## 9. PROMOTION SCHEME

a. A student will be required to clear minimum **40% of his/her papers** in a semester/annual examination to be eligible **for promotion to the next semester/year**. A student may appear in the supplementary examination after each semester/annual examination and can have a choice to appear in the backlog papers in the supplementary examination or in the subsequent regular semester/annual examination with a prescribed fee. A students detained due to shortage of attendance will repeat his/her paper in the subsequent semester concerned (even/odd).

b. A **detained** Student is not allowed to re-appear in the internal assessment (Unit test). His/her old internal assessment marks will remain same.

A student who cleared all the papers of a semester/annual examination of a programme/course will be eligible for improvement examination as per university rule.

## 10. THE GRADING SYSTEM

As per University Rule

## 11. CALCULATION OF SGPA AND CGPA OF A STUDENT IN A SEMESTER

As per University Rule

After having passed all the FOUR semesters, the students shall be eligible for the award of **Master of Computer Applications** degree of JAMIA HAMDARD.

## 12. CLASSIFICATION OF SUCCESSFUL CANDIDATES

The result of successful candidates, who fulfill the criteria for the award of **Master of Computer Applications**, shall be classified at the end of last semester, on the basis of his/her final CGPA (to be calculated as per university rule).

**Name of the Academic Program:** Master of Computer Applications (MCA)  
**Course Code:** MCA-101 **Title of the Course:** Object Oriented Programming  
**L-T-P:** 3-1-0 **Credits:** 4  
(L=Lecture hours, T=Tutorial hours, P=Practical hours)

### COURSE OUTCOMES (COs)

After completing this Course, the students should be able to .....

**CO1:** Understand the concept of OOPs and the characteristics of the C++ programming language. (Cognitive level: Understand)

**CO2:** Understand and apply the concepts of Classes & Objects, constructors, destructors and friend function in program design. (Cognitive level: Apply)

**CO3:** Design and implement various forms of inheritance, describe function overriding and constructor calls in different types of Inheritance. (Cognitive level: Create)

**CO4:** Analyse operator overloading, runtime polymorphism, Generic Programming. (Cognitive level: Analyze)

**CO5:** Analyze and explore various stream classes, I/O operations, and exception handling. Also **illustrate the process of data file manipulations.** (Cognitive level: Analyze)

**Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12
<b>CO1</b>	3	2	3	2	2			1	1	1	1	2
<b>CO2</b>	3		3	3	3	2					1	2
<b>CO3</b>	3		3	3	3							2
<b>CO4</b>	3		3	3	3							2
<b>CO5</b>	3		3	3	3		1					2

Each Course Learning Outcome (CLOs) may be mapped with one or more Program Learning Outcomes (PLOs). Write '3' in the box for 'High-level' mapping, 2 for 'Medium-level' mapping, 1 for 'Low-level' mapping. Map with PSOs wherever applicable.

#### Detailed Syllabus:

Unit 1: 8 hours

Introduction: Introducing Object-Oriented Approach Comparisons with Procedural Approach, Characteristics of Object-Oriented Languages. Basic terms and ideas: Abstraction, Encapsulation, Information hiding, Inheritance, Polymorphism, Review of C, Difference between C and C++, cin, cout, new, delete operators.

Unit 2: 8 hours

Classes and Objects: Abstract data types, Object & classes, attributes, methods, Reference variable, C++ class declaration, State identity and behavior of an object, Constructors and

destructors, copy Constructor, Static Class Data, inline function, default arguments, const arguments Friend Functions.

Unit 3: 8 hours

Inheritance: Inheritance, Types of Inheritance, Class hierarchy, derivation – public, private & protected, Hybrid Inheritance and virtual base class Aggregation, composition vs classification hierarchies, function overriding and constructor calls in different types of Inheritance.

Unit 4: 8 hours

Polymorphism: Type of Polymorphism – Compile time and runtime, Method polymorphism, Polymorphism by parameter, This Pointer, Operator overloading and Type Conversions, Parametric polymorphism, Virtual Functions, Virtual Destructors, Generic Programming – template function and Template Classes.

Unit 5: 8 hours

Files and Exception Handling: Console I/O: Stream, stream classes, unformatted I/O operations, formatted I/O operations, manipulators. File I/O Basics of data files, creating/opening & closing a file, reading data from file, writing data into file, error-handling functions, random access of data files, Namespaces and Exception handling.

#### **Text Books and Reference Books:**

- [1]. Balagurusamy, “Object Oriented Programming with C++”, TMH
- [2]. Stephen Prata “C++ Primer Plus” Pearson Education
- [3]. Schildt Herbert, “C++: The Complete Reference”, Wiley DreamTech, 2005.
- [4]. D. Parsons, “Object Oriented Programming with C++”, BPB Publication
- [5]. A R.Venugopal, Rajkumar, T. Ravishanker “Mastering C++”, TMH, 1997

#### **Teaching-Learning Strategies in brief (4 to 5 sentences)**

1. Build a positive and peaceful environment in the classroom.
2. Provide testing pathway for the knowledge of the subject.
3. Provide subject materials to develop and explore different perspectives.
4. Encourage students for reasoning when solving problems.
5. Motivate the students to develop learning and thinking process.

#### **Assessment methods and weightages in brief (4 to 5 sentences)**

1. By taking two sessional examinations.
2. By giving assignments.
3. By conducting doubt classes.
4. By taking semester examination.
5. Internal assessment (25 Marks), Semester Examination (75 Marks), and Total Marks=100.

**MCA 102 (COMPUTER ORGANIZATION AND ARCHITECTURE)**  
**LTP 25 75 100 3-1-0 Credits 4**

**Course Outcomes:**

1. The main objective of the syllabus is to make students remember the relevance Computer Organization in the software-oriented course.
2. It aims at understanding basic digital concepts and then use them to explain details of computer organization.
3. To apply key skills of constructing cost-effective computer systems.
4. To analyse the basic CPU organization.
5. To help students in evaluating various memory devices and to facilitate students in learning IO communication

**Mapping:**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	3	3	3		2	2	1	1	1
CO2	3	3	3	3	3	3	2	2	2	2	1	1
CO3	3	3	3	3	3				2	1		1
CO4	3	3	3		3	3	2	2			1	1
CO5	3	3		3	3	3	2	2	1			2

Unit – I 8 hours

**BASIC FUNCTIONAL BLOCKS OF A COMPUTER AND ITS REPRESENTATION:**

Functional units, Basic operational concepts, Bus structures, Performance and metrics, Instructions and instruction sequencing, Hardware–Software Interface, Instruction set architecture, Addressing modes, RISC, CISC, ALU design, Fixed point and floating point operations, Case study of a CPU (Intel Atom Board)

Unit – II 8 hours

**CPU CONTROL UNIT DESIGN:** Execution of a complete instruction, Multiple bus organization, Hardwired control, Micro programmed control, Computer arithmetic, Integer addition and subtraction, ripple carry adder, carry look-ahead adder, etc. multiplication - shiftand-add, Booth multiplier etc.

Unit – III 8 hours

**PIPELINE:** Basic concepts, Data hazards, Instruction hazards, Influence on instruction sets, Data path and control considerations, Performance considerations, Exception handling. Case Study of Intel Atom Board.

Unit – IV 8 hours

**MEMORY SYSTEM DESIGN:** Basic concepts, Semiconductor RAM – ROM, Speed, Size and cost, Cache memories, Improving cache performance, Virtual memory, Memory management requirements, Associative memories, Secondary storage devices. Case study of Intel Atom Board.

Unit – V 8 hours

I/O ORGANIZATION: Accessing I/O devices, Programmed Input/Output, Interrupts, Direct Memory Access, Buses, Interface circuits, Standard I/O Interfaces (PCI, SCSI, USB), I/O devices and processors.

#### TEXTBOOKS

1. John P. Hayes, Computer Architecture and Organization, MGH, 1998.
2. William Stallings, Computer Organization and Architecture: Designing for Performance, Pearson Education, 2010.
3. M. Morris Mano, Computer System Architecture, 2nd Edition, PHI.

#### REFERENCE BOOKS

#### TEACHING - LEARNING STRATEGIES

1. BLENDED LEARNING
2. BRAINSTORMING
3. CASE STUDY
4. COMPUTER AIDED PRESENTATION
5. COMPUTER LABS/LAPTOP INSTRUCTION
6. DEMONSTRATION
7. DIRECT INSTRUCTION
8. DISCOVERY LEARNING
9. DISCUSSION
10. DRILL AND PRACTICE
11. EXAMINATION
12. FLIPPED CLASS
13. FULLY ONLINE INSTRUCTION
14. GROUP ACTIVITIES
15. INQUIRY
16. LECTURE
17. MENTAL MODELING
18. MOOC ONLINE
19. PROJECT DEVELOPMENT
20. PROJECT PRESENTATION
21. QUESTION AND ANSWER
22. ROLE PLAY
23. SELF-LEARNING
24. SEMINAR
25. TUTORIAL
26. WEB-ENHANCED LEARNING

#### **Assessment methods and weightages in brief**

1. Internal Assessment: 25
  2. Semester Exam: 75
- Assessments through Sessional, Assignments, Quizzes etc.

Paper Code	Title of the Paper	Course type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA 103	<b>DATABASE MANAGEMENT SYSTEM</b>	PCC	25	75	100	3-1-0	4

### **Course Objectives:**

CO 1. Define the terminology, features, classifications, and characteristics embodied in databasesystems.

CO 2. Analyze an information storage problem and derive an information model expressed in theform of an entity relation diagram and other optional analysis forms, such as a data dictionary.

CO 3. Define the table. Demonstrate the understanding of Integrity constraints.

CO 4. Demonstrate an understanding of normalization theory and apply such knowledge to thenormalization of a database.

CO 5. Use an SQL interface of a multi-user relational DBMS package to create, secure, populate,maintain, and query a database.

### **Unit – I**

#### **Introduction to DBMS**

Basics of File Processing Systems and Database Systems, Difference between traditional file system and DBMS, Responsibilities of Database Administrator, Three level Architecture of Database System, Physical and Logical data independence.

### **Unit – II**

8 hours

#### **Introduction to various Database Models**

Entity Relationship Model and its importance, Introduction to various Symbols used In ERD (Entity:Types of Entities, weak Entity, Composite Entity, Strong Entity, Attribute: Types of Attribute, Relationship: Type of relationship, Connectivity, Cardinality), Conversion of

ER diagram to tables, Comparative study of Network, Hierarchical and Relational Models, Codd's 12 Rules, Comparison of Object Oriented Database and Object Relational Database.

### Unit – III

8 hours

#### **Normalization in DBMS**

Normalization and its various forms( 1NF, 2NF, 3NF and BCNF), Functional Dependencies, Multi- valued Dependencies, Study of various Database Integrity like Domain, Entity, Referential Integrity Constraints.

### Unit – IV

8 hours

#### **Normalization in DBMS**

Categories of SQL Statements, The CREATE Statement, The DROP Command, The ALTER Command, Integrity Constraints, DML Statements: The SELECT Statement, The INSERT Statement, The DELETE Statement, The UPDATE Statement, SQL Operators: Simple Selects Comparison Operators, IN and NOT IN Operators, BETWEEN Operator, The LIKE Operator Logical

Operators, IS NULL and IS NOT NULL, ANY, ALL, SQL FUNCTIONS, Joining Tables, SQL Subqueries, GROUP BY Clause, HAVING Clause

### Unit – V

8 hours

#### **Transactions**

Basic concepts, ACID Properties . Concurrency control techniques: Items, locks, Deadlocks, serializability, Locking two phase locking, Database recovery technique: Failure classification, recovery concepts, recovery techniques based on deferred and immediate update, Shadow paging.

### TEXTBOOKS

- *R. Elmasri & S.B. Navathe, Fundamentals of Database Systems, Pearson Education, 6th edition, 2010.*

### REFERENCE BOOKS

*Silberschatz, H. Korth & S. Sudarshan, Database System Concepts, TMH, 5th Edition, 2010.*

*R. Ramakrishnan & J. Gehrke, Database Management Systems, 3rd edition, TMH, 2007.*

### Learning Outcomes:

On successful completion of the course, the students will be able to:

1. Differentiate database systems from file systems by enumerating the features provided by database systems and describe each in both function and benefit.
2. Demonstrate an understanding of the relational data model.
3. Transform an information model into a relational database schema and to use a data definition language and/or utilities to implement the schema using a DBMS.

4. Formulate, using relational algebra, solutions to a broad range of query problems.
5. Formulate, using SQL, solutions to a broad range of query and data update problems.

**Teaching-Learning Strategies in brief**

TEACHING - LEARNING STRATEGIES

1. BLENDED LEARNING
2. BRAINSTORMING
3. CASE STUDY
4. COMPUTER AIDED PRESENTATION
5. COMPUTER LABS/LAPTOP INSTRUCTION
6. DEMONSTRATION
7. DIRECT INSTRUCTION
8. DISCOVERY LEARNING
9. DISCUSSION
10. DRILL AND PRACTICE
11. EXAMINATION
12. FLIPPED CLASS
13. FULLY ONLINE INSTRUCTION
14. GROUP ACTIVITIES
15. INQUIRY
16. LECTURE
17. MENTAL MODELING
18. MOOC ONLINE
19. PROJECT DEVELOPMENT
20. PROJECT PRESENTATION
21. QUESTION AND ANSWER
22. ROLE PLAY
23. SELF-LEARNING
24. SEMINAR
25. TUTORIAL
26. WEB-ENHANCED LEARNING

**Assessment methods and weightages in brief**

3. Internal Assessment: 25

4. Semester Exam: 75  
Assessments through Sessional, Assignments, Quizzes etc.

Paper Code	Title of the Paper	Course type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA 104	<b>Software Engineering</b>	PCC	25	75	100	3-1-0	4

**Course Objectives:**

The aim of the course is to provide an understanding of the working knowledge of the techniques for estimation, design, testing and quality management of large software development projects.

Topics include process models, software requirements, software design, software testing, software process/product metrics, risk management, quality management and UML diagrams

**Course Outcomes:**

On successful completion of this module, the student should:

- Understand the key concerns that are common to all software development processes.
- Be able to select appropriate process models, approaches and techniques to manage a given software development process.
- Be able to elicit requirements for a software product and translate these into a documented design.
- Be able to identify dependability and security issues that affect a given software product.
- Understand the role that testing and reuse play in the implementation phase and how these activities relate to the wider software process.

**Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1	PO1 2

<b>CO 5</b>	3	3	3	2	3	1	1	1	1	1	1	3

#### **UNIT - I**

8 hours

Introduction to Software Engineering: The evolving role of software, changing nature of software, software myths. A Generic view of process: Software engineering- a layered technology, a process framework, the capability maturity model integration (CMMI), process patterns, process assessment, personal and team process models. Process models: The waterfall model, incremental process models, evolutionary process models, the unified process.

#### **UNIT - II**

8 hours

Software Requirements: Functional and non-functional requirements, user requirements, system requirements, interface specification, the software requirements document. Requirements engineering process: Feasibility studies, requirements elicitation and analysis, requirements validation, requirements management. System models: Context models, behavioral models, data models, object models, structured methods.

#### **UNIT - III**

8 hours

Design Engineering: Design process and design quality, design concepts, the design model. Creating an architectural design: software architecture, data design, architectural styles and patterns, architectural design, conceptual model of UML, basic structural modeling, class diagrams, sequence diagrams, collaboration diagrams, use case diagrams, component diagrams.

#### **UNIT - IV**

8 hours

Testing Strategies: A strategic approach to software testing, test strategies for conventional software, black-box and white-box testing, validation testing, system testing, the art of debugging. Product metrics: Software quality, metrics for analysis model, metrics for design model, metrics for source code, metrics for testing, metrics for maintenance.

#### **UNIT - V**

8 hours

Metrics for Process and Products: Software measurement, metrics for software quality. Risk management: Reactive Vs proactive risk strategies, software risks, risk identification, risk projection, risk refinement, RMMM, RMMM plan. Quality Management: Quality concepts, software quality assurance, software reviews, formal technical reviews, statistical software quality assurance, software reliability, the ISO 9000 quality standards.

#### **TEXT BOOKS:**

1. Software Engineering, A practitioner's Approach- Roger S. Pressman, 6th edition, Mc Graw Hill International Edition.
2. Software Engineering- Sommerville, 7th edition, Pearson Education.
3. The unified modeling language user guide Grady Booch, James Rumbaugh, Ivar Jacobson, Pearson Education.

#### **REFERENCE BOOKS:**

1. Software Engineering, an Engineering approach- James F. Peters, Witold Pedrycz, John Wiley.
2. Software Engineering principles and practice- Waman S Jawadkar, The Mc Graw-Hill Companies.
3. Fundamentals of object-oriented design using UML Meiler page-Jones: Pearson Education.

**Name of the Academic Program: - Master of Computer Application**

**Course Code: MCA-105**

**Title of the Course: Data Communication and Computer Networks**

**L-T-P: 3-1-0**

**Credits: - 04**

(L=Lecture hours, T=Tutorial hours, P=Practical hours)

### **COURSE OUTCOMES (COs)**

After completing this Course, the students should be able to:

- CO1** Understand Basic Computer Network Technology. Describe Network architecture. Enumerate the layers of OSI model and TCP/IP Model. Explain the functions of each layer.
- CO2** Describe Data Link protocols, Access Control, Overview of IEEE 802.11 standards for LAN
- CO3** Demonstrate routing in Network layer with routing algorithms and IPV4 Schemes, understanding concepts of Subnets
- CO4** Describe elements and protocols of Transport & Application Layer, Summaries Transport Layer- Connection Management
- CO5** Analyzing why networks need security and control, what errors might occur, and how to control network errors

### **Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

<b>Course Outcomes</b>	<b>PO1</b>	<b>PO2</b>	<b>PO3</b>	<b>PO4</b>	<b>PO5</b>	<b>PO6</b>	<b>PO7</b>	<b>PO8</b>	<b>PO9</b>	<b>PO10</b>	<b>PO11</b>	<b>PO12</b>
<b>CO1</b>	3	2	2	1	1	1	2	1	1	1	1	1
<b>CO2</b>	3	3	3	3	2	1	2	1	2	1	1	2
<b>CO3</b>	3	3	3	3	3	2	2	2	2	2	3	2
<b>CO4</b>	3	3	3	3	2	2	3	2	3	2	3	3
<b>CO5</b>	3	3	3	3	3	3	3	3	3	2	3	3

Each Course Outcome (CO) may be mapped with one or more Program Outcomes (POs). Write '3' in the box for 'High-level' mapping, 2 for 'Medium-level' mapping, 1 for 'Low'-level' mapping.

### Detailed Syllabus:

#### Unit – I

8 hours

**Transmission Media:** Twisted pair, Coaxial Cable, Fiber Optics, Wireless transmission, Bluetooth, Radio, Microwave, Infrared.

**Network Classifications:** Study of various Types of Networks ( LAN, MAN, WAN, WLAN, PAN,etc. ), Comparison of various enterprise network infrastructures ( Internet, Intranet, and Extranet), Introduction to IEEE 802 family.

#### Unit – II

8 hours

**Introductory Concepts** - Network hardware - Network software - Physical layer – Guided transmission media, OSI reference model

**Data Link Layer** –Error Detection and Correction, Data link control and protocol, Design issues

- Channel allocation problem - Multiple access protocols -Ethernet - Wireless LAN - 802.11 architecture.

#### Unit – III

8 hours

**Network Layer** – Addressing, Design issues, Routing algorithms, Congestion control algorithms Quality of Service, Internetworking.

#### Unit – IV

8 hours

**Transport Layer** - Transport service - Elements of transport protocols - User Datagram Protocol - Transmission Control Protocol.

#### Unit – V

8 hours

**Application Layer** - DNS - Electronic mail - World Wide Web - Multimedia – Network security.

### TEXT BOOKS

- A.S.TANENBAUM, "Computer Networks", Pearson Education, IV Edition, 2003
- W.STALLINGS, "Data and Computer Communication", Pearson Education, 2001
- B.A Forouzan "Data Communication and Networking" TMH

### REFERENCE BOOKS

- Shanmavgaon, K.S. "Digital and Analog Communication System", John Wiley and Sons.
- Roden, M.S. "Analog and Digital Communication System", P.H.I.
- Scheber, W.L. "Data Communication", MGH.

### Teaching-Learning Strategies in brief

1. Provide visuals, illustrations, explanations etc.
2. Provide basic and advanced knowledge about the subject.
3. Providing LMS to access study materials across various devices.
4. Encourage the students to ask more & more questions.

5. Motivate the students to develop critical & strategic thinking

**Assessment methods and weightages in brief**

1. Sessional examination (2 Nos.)
2. Assignments.
3. Class tests
4. Semester examination
5. **Internal assessment (25 Marks) & Semester Examination (75 Marks) & Total Marks-100.**

**Name of the Academic Program: - Master of Computer Application**

**Course Code: MCA-106**

**Title of the Course: Communication Skills**

**L-T-P: 2-0-0**

**Credits: - 02**

(L=Lecture hours, T=Tutorial hours, P=Practical hours)

**COURSE OUTCOMES (COs)**

After completing this Course, the students should be able to:

**CO-1. Understand the basic rules of Grammar, avoid committing common mistakes**

**CO-2. Read, comprehend, and pronounce correctly**

**CO-3. Identify and use strategies for effective communication, including giving presentations**

**CO-4. Know the pitfalls of General and Technical Writings**

**CO-5. Demonstrate increased awareness of forms of communication and social behaviour**

**Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1	PO1 2
CO 1	1	1	1	1	1	1	1	1	3	2	2	2
CO 2	2	2	2	2	2	2	2	2	3	3	3	3
CO 3	2	2	2	2	2	2	2	2	3	3	3	3
CO 4	2	2	2	2	2	2	2	2	3	3	3	3
CO 5	2	3	2	2	2	2	2	2	3	3	3	3

Each Course Outcome (CO) may be mapped with one or more Program Outcomes (POs). Write '3' in the box for 'High-level' mapping, 2 for 'Medium-level' mapping, 1 for 'Low'-level' mapping.

**Detailed Syllabus:**

**Course Description:**

Technical Communication is most essential for students and professionals. Thus, there is a drastic need for effective communication. Due to the various phenomenal changes in the business environment, recruiters are now looking for students with good computer knowledge as well as good communication skills. Thus, the objective of this course is to equip the students with the basics of communication skills and technical writing, so that they can put them into use in their day-to-day activities.

**Course Objectives:**

1. To give a brief summary of the rules of Grammar
2. To teach the importance, types and nuances of communication in our lives
3. To impart effective reading, writing, speaking and listening skills
4. To teach drafting and presentation skills
5. Teach to communicate effectively orally and in writing

**UNITS COURSE**

**Unit 1 Listening Skills:**

8 hours

The Lynchpin of Communication, Hearing & Listening, Active Listening, Kinds of Listening, Barriers to Good Listening, Barriers to Good Listening, Chinese Whisper, Good Listening, Role Play, Role Descriptions.

**Unit 2 Writing Skills:** 8 hours

The Basics of Writing, The Process of Writing, Paragraph, Instructional Writing, Precis Writing,

Abstract Writing, Note-Taking, Redundancy, Ambiguity, Cliché Words & Phrases, Formal & Informal Words, Intellectual & Emotional Words, Synonyms & Antonyms, Types of Writing, Difference between an Abstract & a Summary, Resume, CV, Statement of Purpose

**Unit 3 Corporate Communication Public Speaking:** 8 hours

Importance of Talk in a Team, Conflict Management, Communication in Teams, Group Discussions, Structuring the Group Discussion, Interviews, Problem Solving Skills, Decision making Process, Techniques in Interviewing, Preparation for an Interview, Kinds of Questions

Expected in Interviews, The Interview Process, Self-Confidence Tips, Presentation Skills

**Unit 4 Non-Verbal Communication:** 8 hours

The Communicating Body, Studying Body Language, Distance & Positioning, Body Orientation, KOPPACT factors, Mirror Imaging, Negative & Positive Cues, Cross-Cultural Communication, Barriers to Communication, Role Plays, Role Descriptions

**Unit 5 Creativity & Mind-Mapping:** 8 hours

Creativity, Times When Are Creative, Ways in Which You Can Be Creative, Developing Your

Creativity, Factors that Blocks Creativity, Mind-Mapping: The Networking of Ideas, Mind Mapping and the Learning Process, Mind-Mapping: Do's and Don'ts

### **Course Outcome:**

- After successful completion of this course, students will be able to:
- Effectively communicate through verbal/oral communication and improve the listening skills
- Able to be self-confident with positive vibes
- Actively participate in group discussion/meetings/interviews and prepare & deliver presentations Become a more effective individual through goal/target setting, selfmotivation, and practicing creative thinking.
- Function effectively in multi-disciplinary and heterogeneous teams through the knowledge of teamwork, interpersonal relationships, conflict management, and leadership quality.

### **Textbooks:**

1. Business Communication, 2nd Edition, Meenakshi Raman, Prakash Singh, OXFORD
2. Technical Communication – Principles and Practice, 2nd Edition, Meenakshi Raman, Sangeeta Sharma, OXFORD

### **Reference Books:**

- Managing Soft Skills for Personality Development –edited by B.N.Ghosh, McGraw Hill India, 2012.
- Effective Communication and Soft Skills, Nitin Bhatnagar, Pearson Education India, 2011
- English and Soft Skills – S.P.Dhanavel, Orient Blackswan India, 2010.

### **Suggested Readings:**

- ✓ English for Practical Purposes. N. Patil, B. S. Valke, Ashok Thorat, Zeenat Merchant

- ✓ Business Communication, Urmila Rai and S.M. Rai
- ✓ Personality Development and Communicative English, Dr. S.R. Pandya and Dr. Pratima Dave Shastri
- 4) Better English Pronunciation, J D O'Connor,
- ✓ Oxford Guide to Effective Writing and Speaking, John Seely
- ✓ 7 Habits of Highly effective People, Stephen Covey
- ✓ Think and Growth, Napoleon Hill

**Teaching-Learning Strategies in brief:**

6. Build positive and peaceful environment in the classroom.
7. Provide testing pathway for the knowledge of the subject.
8. Provide subject materials to develop and explore different perspectives.
9. Encourage students for reasoning when solving problems.
10. Motivate the students to develop learning and thinking process.

**Assessment methods and weightages in brief:**

6. By taking two sessional examinations.
7. By giving assignments.
8. By conducting group discussions.
9. By taking speeches/short presentations.
10. By taking semester examination.

**Internal assessment (25 Marks) & Semester Examination (75 Marks) & Total Marks-100.**

**Name of the Academic Program :MCA**

**Course Code: MCA 201**

**Title of the Course:Mathematical Foundations for Computer Applications**

**L-T-P:3-1-0(L=Lecture hours, T=Tutorial hours, P=Practical hours)**

Course Learning Objectives:

To acquaint the student with mathematical reasoning in order to read, comprehend and construct mathematical arguments.

To operate elementary transformations on matrices to solve system of linear equations, compute eigen values, eigen vectors and diagonalise a square matrix.

To provide sufficient knowledge of probability distributions and sampling theory that serve as an essential tool for applications of computer and information sciences.

To use the principles of correlation and regression in practical problems.

To understand various graphs in different geometries related to edges.

Course Outcomes: On successful completion of the course the students will be able to:

CO1: Solve problems using operation on sets, Inclusion - Exclusion principles, Construct the matrix, digraphs of relations, Identify different type's relations, functions, compute composition and inverse of a function and solve recurrence relations.

CO2: Operate elementary transformations on matrices to solve system of linear equations, compute eigen values, eigen vectors and diagonalise a square matrix.

CO3: Solve problems associated with discrete probability distributions and compute different measures of central tendency and dispersion for a given data.

CO4: Apply the principles of correlation and regression in practical problems.

CO5: Define and explain the basic concepts of graph theory and solve problems in almost every conceivable discipline using graph models...

**Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	2	1	1	2	1	1	1	1	2	1	1	2
CO2	1	2	1	1	2	1	2	3	1	2	1	1
CO3	2	1	1	1	1	1	1	1	2	1	1	1

<b>CO4</b>	1	2	1	2	3	2	1	1	1	2	1	2
<b>CO5</b>	2	1	1	1	1	1	2	1	2	1	1	1

## **MCA 201          Mathematical Foundations for Computer Applications**

### **UNIT 1: Matrix Algebra**

8 hours

Rank of a Matrix, Solution of equations by Matrix Method, Symmetric, skew-symmetric and orthogonal matrices, Eigen values and Eigen vectors, Cayley Hamilton Theorem.

### **UNIT 2: Basic Set Theory**

8 hours

Basic definitions, set operations, Venn Diagram, Cartesian Products, Domain and Range of Relation, Inverse Relation, Reflexive, Types of Relations: Symmetric, Asymmetric, Anti-symmetric, Transitive, Equivalence Relation, Partition, Types of functions, Inverse function, Composition of functions.

### **UNIT 3: Counting Techniques**

8 hours

Inclusion and Exclusion Principal, Pigeon-hole Principle, Permutation and Combination.

### **UNIT 4: Mathematical Logic**

8 hours

Propositions and Logical operators, Truth tables, Proposition generated by a set, Propositional Equivalence, Logical Equivalence, Algebra of Propositions, Predicates, Quantifiers.

### **UNIT 5: Graph Theory**

8 hours

Basic definitions, Types of graph, Path, Simple Path, Trail, Closed Path, Cycle, Complementary Graph, Subgraphs, Spanning Subgraph, Isomorphism Graph, Homeomorphic Graph, Connected and Disconnected Graph, Complete Graph, Labeled Graph, Regular Graph, Bipartite Graph, Eulerian and Hamiltonian Path, Circuit and Graph, Planar and Non Planer Graph.

## Course Design

Name of the Academic Program : MCA

Course Code: MCA 202 Title of the Course: Data Structure & Algorithms

L-T-P.....3-1-0..... Credits.....4.....

(L=Lecture hours, T=Tutorial hours, P=Practical hours)

### Course Outcomes:

1. Understand the basic Data Structure Concepts.(Cognitive level: Understand)
2. To analyze the role of data structures in structuring and manipulating data and implement them
3. Be acquainted with operations of Arrays, Linked List, Stacks, and Queues(Cognitive level: Apply, Remember)
4. Implement the various Searching and Sorting Techniques (Cognitive level: Apply, Create)
5. Be acquainted with operations of Trees and Graphs(Cognitive level: Apply, Remember)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	2	1	1	1	-	3	-	-	-	-	-
CO2	3	3	2	2	2	-	3	-	-	-	-	-
CO3	3	2	3	2	2	-	3	-	-	-	-	-
CO4	3	2	3	2	1	-	3	-	-	-	-	-
CO5	3	2	3	3	2	-	3	-	-	-	-	-

Each Course Outcome (CO) may be mapped with one or more Program Outcomes (POs).

3 for 'High-level' mapping,

2 for 'Medium-level' mapping,

1 for 'Low'-level' mapping.

### Unit – I

8 hours

Arrays and Linked Lists: Storage structures for arrays, matrix, row-major, column-major, Sparse matrices. Linked list, Doubly linked lists, Circularly linked lists – Operations on polynomials, Dynamic storage management - Garbage collection and compaction.

### Unit – II

8 hours

Stack and QueueStacks and queues: insertion, deletion, Stack and queue using linked list, Circular queue, Prefix, postfix, infix notation and conversions.

### Unit – III

8 hours

Trees Binary tree insertion, deletion, traversal (inorder, preorder and postorder), Binary Search Tree, Threaded binary tree, AVL tree, B-tree, B+-tree.

**Unit – IV**

8 hours

Sorting and Searching Selection sort, Insertion sort, Bubble sort, Merge Sort, Heap sort, and Quick sort, sorting in linear time, Hash Tables.

**Unit – V**

8 hours

Graph Representation of Graphs, Breadth First Search, Depth First Search, Topological Sort, Strongly Connected Components, Algorithm for Kruskal's and Prim's for Finding Minimum cost Spanning Trees, Dijkstra's Algorithm for finding Single source shortest paths.

**TEXT BOOKS** Seymour Lipschutz, "Data Structures with C", Schaum's Outline Series

**Teaching-Learning Strategies in brief (4 to 5 sentences)**

1. Learning by doing
2. Open ended questions by teacher
3. Open ended questions from students
4. Preparation of question bank by students at various cognitive level

**Assessment methods and weightages in brief (4 to 5 sentences)**

1. problem based assignments;
2. practical assignment laboratory reports;
3. observation of practical skills;
4. time-constrained examinations;
5. closed-book and open-book tests;

**Name of the Academic Program : MCA**

**Course Code: MCA 203**

**Title of the Course: JAVA PROGRAMMING**

**L-T-P: 3-1-0**

**Credits: 4**

(L=Lecture hours, T=Tutorial hours, P=Practical hours)

**COURSE OUTCOMES (COs)**

**(5 to 8 in case 3 or 4 credit courses)**

After completing this Course, the students should be able to .....

CO1. To identify and apply the scope and need of Java Programming

CO2. To develop ability to understand various algorithms based on Java Programming.

CO3. To apply the best coding effectively practices and to identify and use the language specific feature available us a library function

CO4. To understand the design of Java applications based on Object Oriented Programming Principles.

CO5.To learn why unit testing is part of developer role and apply it in java code units

**Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1					2		3			1		
CO2						1	2	2				
CO3	3	2			2			1	2	1		2
CO4			3			2						
CO5	2				2		3					

Each Course Outcome (CO) may be mapped with one or more Program Outcomes (POs). Write '3' in the box for 'High-level'mapping, 2 for 'Medium-level'mapping, 1 for 'Low'-level'mapping.

## Detailed Syllabus: JAVA PROGRAMMING

### **Unit – I Java Basics**

8 hours

Java and Internet, Difference between C++ and Java, Byte code and platform independence, Features of Java, Java Standard Edition (Java SE), Java Runtime Environment (JRE), Java Just In Time (JIT) Compiler, Installing JDK, Compiling and executing Java Application, Java Program Structure, Java Keywords, Data types, Variables, Arrays, Expressions, Operators, Control Statements, for each statement, Command Line Arguments.

### **Unit – II**

#### **Object-Oriented Programming – I**

8 hours

Class and Encapsulation, Objects, Methods, Default and parameterized Constructors, Inheritance, super and this Keywords, Static Methods, Polymorphism, Overloading, Overriding, Dynamic Method Dispatch.

### **Unit – III**

#### **Object-Oriented Programming – II**

8 hours

Abstract class, final Keyword, Interface and Multiple Inheritance, Package, Creating Package, Using Imports, static import, Access Controls, public, private, protected and default Control, Using Scanner Class for Formatted Input, Universal Superclass Object, toString() Method, Variable Argument List.

### **Unit – IV**

#### **String, Exception handling and Multithreading**

8 hours

String, Methods of String, StringBuffer and StringBuilder, Exception, try and catch Statement, Multiple catch Statements, Nested try Statement, throw, throws and finally Statements, Creating Exception Subclasses, Thread, Advantages of Thread, Creating Threads by Extending Thread Class and Implementing Runnable Interface, Creating Multiple Threads, Life Cycle of a Thread, Thread Priorities, Thread Synchronization.

### **Unit – V**

#### **Unit Testing in Java**

8 hours

Introduction, Unit Testing meaning, Terminology, Why developers do unit testing Unit Testing with Junit, Installation of Junit and integration to the IDE, JUnit APIs,

Test Cases, Assert, TestRunner, TestSuite, Preparation, Create a Java class, Create a JUnit test for that class, Running your test cases.

### **TEXT BOOKS**

- *Herbert Schildt, Java: The Complete Reference, Seventh Edition, DEC-06, ISBN: 9780072263855*
- *Joel Murach and Andrea Steelman, Murach's Java SE 6, ISBN-10: 1-890774-42-1; ISBN-13: 978-1-890774-42-4*

### **REFERENCE BOOKS**

- *Katherine Sierra, Kathy Sierra, Bert Bates, SCJP Sun Certified Programmer for Java 6 Study Guide: Exam (310-065), McGraw-Hill Companies, June 2008, ISBN-13: 9780071591065*
- *Jeff Friesen, Beginning Java SE 6 Platform: From Novice to Professional, Apress*

- *Khalid Mughal, Rolf Rasmussen, A Programmer's Guide to Java SCJP Certification: A Comprehensive Primer, 3/e, ISBN: 0321556054*

### **Teaching-Learning Strategies in brief (4 to 5 sentences)**

With theoretical aspects explained for each topic, a live code demo is given in the class to make students understand the practical aspect of it in the class itself as well as the common error that they might encounter while developing code on day-to-day basis. Live code demo is also intended to take the students to the next level of the best java coding conventions and practices as the course progresses and the student is capable of understanding better.

### **Assessment methods and weightages in brief (4 to 5 sentences)**

Assessment will be carried out as internal assessment with weightage of 25 % based on sessional, assignment and quizzes. External assessment will have weightage of 75 % based final exam.

Name of the Academic Program MCA

**Detailed Syllabus:**

Unit 1: Computer System Overview-Basic Elements, Instruction Execution, Interrupts, Memory Hierarchy, Cache Memory, Direct Memory Access, Multiprocessor and Multicore Organization. Operating system overview-objectives and functions, Evolution of Operating System, Layered Approach, Introduction to Virtual Machines. 8 hours

Unit 2: Process State, Process Control Block, Process Scheduling, Operation on processes, Cooperating Processes, Threads. 8 hours

Unit 3: Principles of Concurrency-Mutual Exclusion, Semaphores, Monitors, Readers/Writers problem. Deadlocks-prevention-avoidance-detection, Scheduling- Basic Concepts of Scheduling,types of scheduling algorithms. 8 hours

Unit 4: Memory management requirements, swapping, memory allocation, Partitioning, Paging and Segmentation, Virtual memory - Demand Paging; Page Replacement algorithm. 8 hours

Unit 5: I/O management and disk scheduling – I/O devices, organization of I/O functions; OS design issues, I/O buffering, disk scheduling, Disk cache. File management – Organization, Directories, File sharing, and Record blocking, secondary storage management. 8 hours

**Reference Books:**

1. Silberschatz, Galvin and Gagne, “Operating Systems Concepts”, Wiley
2. Andrew S. Tanenbaum, “Modern Operating System”, PHI Learning
3. Tanenbaum /Woodhaull “Operating System Design and Implementation”, Pearson Publication.
4. Harvey M Dietel, “ An Introduction to Operating System”, Pearson Education.
5. Achyut S Godbole, Atul kahate , “Operating System”, McGraw Hill.

**Teaching-Learning Strategies in brief (4 to 5 sentences)**

**For teaching, ICT tools have been used. Also, white board teaching had been done for explaining and clarifying many concepts and numericals.**

**Assessment methods and weightages in brief (4 to 5 sentences)**

2 sessionals had been conducted. Also, assignments were provided. Quizzes had been conducted too.

## MCA PE111 Artificial Intelligence

LTP: 25 75 100 3-1-0 Credits: 4

### Course Outcomes

CO1: To help students understand historical perspective of AI and its foundations.

CO2: To help students apply Become familiar with basic principles of AI toward problem solving, inference, perception, knowledge representation, and learning.

CO3: Analyze applications of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning models.

CO4: Evaluate and Experience AI development tools such as an 'AI language', expert system shell, and/or data mining tool. Experiment with a machine learning model for simulation and analysis.

CO5: Create and Explore the current scope, potential, limitations, and implications of intelligent systems.

Mapping:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	3	3	3		2	2	1	1	1
CO2	3	3	3	3	3	3	2	2	2	2	1	1
CO3	3	3	3	3	3	3			2	1		1
CO4	3	3	3	3	3	3	2	2			1	1
CO5	3	3	3	3	3	3	2	2	1			2

### **UNIT-I: Introduction to artificial intelligence:**

8 hours

Introduction , history, intelligent systems, foundations of AI, applications, tic-tac-tie game playing, development of AI languages, current trends in AI, Problem solving: state-space search and control strategies: Introduction, general problem solving, characteristics of problem, exhaustive searches, heuristic search techniques, iterative deepening a\*, constraint satisfaction.

### **UNIT-II: Problem reduction and game playing:**

8 hours

Introduction, problem reduction, game playing, alpha beta pruning, two-player perfect information games, Logic concepts: Introduction, propositional calculus, propositional logic, natural deduction system, axiomatic system, semantic tableau system in propositional logic, resolution refutation in propositional logic, predicate logic.

### **UNIT-III: Knowledge representation:**

8 hours

Introduction, approaches to knowledge representation, knowledge representation using semantic network, extended semantic networks for KR, knowledge representation using

frames, advanced knowledge representation techniques: Introduction, conceptual dependency theory, script structure, cyc theory, case grammars, semantic web, Expert system and applications: Introduction phases in building expert systems, expert system versus traditional systems, rule-based expert systems blackboard systems truth maintenance systems, application of expert systems, list of shells and tools.

***UNIT-IV: Uncertainty measure: Probability theory:***

8 hours

Introduction, probability theory, Bayesian belief networks, certainty factor theory, Dempster-Shafer theory, Fuzzy sets and fuzzy logic: Introduction, fuzzy sets, fuzzy set operations, types of membership functions, multi valued logic, fuzzy logic, linguistic variables and hedges, fuzzy propositions, inference rules for fuzzy propositions, fuzzy systems.

***UNIT-V: Machine learning paradigms:***

8 hours

Introduction, machine learning systems, supervised and unsupervised learnings, inductive learning, deductive learning, clustering, support vector machines, case based reasoning and learning, Artificial neural networks: Introduction, artificial networks, single layer feed forward networks, multi layered forward networks, design issues of artificial neural networks.

**Readings**

4. S. Nirenburg, (ed) Machine Translation: I Theoretical and Methodological Issues. Cambridge, Cambridge University Press, 1987.
5. W.A. Sedlow, and S.Y. Sedlow, (eds.) Computer in Language Research, Hillsdale: N.S. Lawrence Erlbawn, 1979.

**TEACHING - LEARNING STRATEGIES**

1. BLENDED LEARNING
2. BRAINSTORMING
3. CASE STUDY
4. COMPUTER AIDED PRESENTATION
5. COMPUTER LABS/LAPTOP INSTRUCTION
6. DEMONSTRATION
7. DIRECT INSTRUCTION
8. DISCOVERY LEARNING
9. DISCUSSION
10. DRILL AND PRACTICE
11. EXAMINATION
12. FLIPPED CLASS
13. FULLY ONLINE INSTRUCTION
14. GROUP ACTIVITIES
15. INQUIRY
16. LECTURE

17. MENTAL MODELING
18. MOOC ONLINE
19. PROJECT DEVELOPMENT
20. PROJECT PRESENTATION
21. QUESTION AND ANSWER
22. ROLE PLAY
23. SELF-LEARNING
24. SEMINAR
25. TUTORIAL
26. WEB-ENHANCED LEARNING

Assessment methods and weightages in brief

1. Internal Assessment: 25
2. Semester Exam: 75  
Assessments through Sessional, Assignments, Quizzes etc.

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA PE112	WEB TECHNOLOGY	PCC	25	75	100	3-1-0	4

### **COURSE OBJECTIVES:**

1. To teach students the basics of server side scripting using PHP
2. To explain web application development procedures
3. To impart servlet technology for writing business logic
4. To facilitate students to connect to databases using JDBC
5. To familiarize various concepts of application development using JSP

### **COURSE OUTCOMES:**

Upon completion of this course, students will be able to:

- CO 1. Create web pages using PHP
- CO 2. Design web application using MVC architecture
- CO 3. Identify the engineering structural design of XML and parse tree
- CO 4. Analyze the difference between and PHP and XML.
- CO 5. Understand the concept of JAVA SCRIPTS.
- CO 6. Identify the difference between the JSP and Servlet.
- CO 7. Apply JDBC and ODBC technologies to create database connectivity

### **Unit – I**

**INTRODUCTION:** Introduction to Multimedia, Multimedia Information, Multimedia Objects, Multimedia in business and work. Convergence of Computer, Communication and Entertainment Products ,Stages of Multimedia Projects: Multimedia hardware, Memory & storage devices, Communication devices, Multimedia software's, presentation tools, tools for object generations, video, sound, image capturing, authoring tools, card and page based authoring tools. 8 hours

### **Unit – II**

**MULTIMEDIA BUILDING BLOCKS:** Text, Sound MIDI, Digital Audio, audio file formats, MIDI under windows environment Audio & Video Capture. 8 hours

### **Unit – III**

**EMERGENCE OF THE INTERNET:** Terminology, Accessibility: Language & Connectivity, Services of the Internet: E-Mail, World Wide Web (WWW), Remote Access, Collaboration, File Sharing, Internet Telephony; Use & Culture: Usenet, From gopher to WWW, Search Engines: Wais, Archie, Web Search Engine. 8 hours

### **Unit – IV**

**INTRODUCTION AND WEB DEVELOPMENT STRATEGIES:** History of Web, Protocols governing Web, Creating Websites for individual and Corporate World, Cyber Laws, Web Applications, Writing Web Projects, Identification of Objects, Target Users, Web Team, Planning and Process Development. 8 hours

## **Unit – V**

**CONCEPTS OF WEB PROGRAMMING:** Developing Web using HTML, DHTML, CSS, XML, Using Scripting Languages such as JavaScript. 8 hours

### **TEXTBOOKS**

- *Tay Vaughan, Multimedia, Making IT Work, MGH*
- *Rajkamal, Web Technology, TMH, 2001..*

### **REFERENCE BOOKS**

- *David Hillman, Multimedia technology and Applications, Galgotia Publications.*
- *Rosch, Multimedia Bible, Sams Publishing.*
- *Stephen Holzner, HTML Black Book , Wiley Dreamtech.*
- *Deitel & Deitel, Goldberg, Internet and world wide web – How to Program, Pearson Education.*

**Name of the Academic Program - Master of Computer Applications (MCA)**

**Course Code: MCA PE 113**

**Title of the Course: Software testing and Quality**

**Assurance**

**L-T-P: 3-1-0**

**Credits: 4**

(L=Lecture hours, T=Tutorial hours, P=Practical hours)

**COURSE OUTCOMES (COs)**  
**(5 to 8 in case 3 or 4 credit courses)**

After completing this Course, the students should be able to-

CO-1: Understand and apply quality assurance and quality control techniques

CO-2: Create QA plan and Test Plan to assure software testing and software quality assurance principles

CO-3: **Create and implement test case and test suites for testing all aspects of a software system**

CO-4: Create, compile and report findings of a quality assurance cycle.

CO-5: Apply software quality assurance as per the standards and in testing and production environment

**Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>CO1</b>	3	3	3	3	3	2	2	3	2	-	-	-
<b>CO2</b>	3	3	3	3	3	2	2	3	2	-	2	-
<b>CO3</b>	3	3	3	3	3	2	2	3	2	-	2	2
<b>CO4</b>	3	3	3	3	3	2	2	3	2	-	2	1
<b>CO5</b>	3	3	3	3	3	2	2	3	2	-	2	2

**Detailed Syllabus:**

Unit 1: Software Quality, Software Errors, faults and failures, Software Quality Assurance, Components of Software Quality Assurance System, Project Software Quality Components, Development and Quality Plans. 8 hours

Unit 2: SQA components in the project life cycle, Integrating quality activities in the project life cycle, Classic and other software development methodologies, Factors affecting intensity of quality assurance activities in the development process, Verification, validation and qualification, A model for SQA defect removal effectiveness and cost, Review objectives Formal design reviews (DRs). 8 hours

Unit 3: Software testing – strategies, Definition and objectives, Software testing strategies Software test classifications, White box testing, Black box testing, Software testing – implementation, The testing process, Test case design, Automated testing, Alpha and beta site testing programs. 8 hours

Unit 4: Assuring the quality of software maintenance components, Assuring the quality of external participants' contributions, CASE tools and their effect on software quality. 8 hours

Unit 5: Management components of software quality, Project progress control, Software quality metrics, Costs of software quality, Quality management standards, ISO 9001 and ISO 9000-3, Capability Maturity Models – CMM and CMMI, IEEE software engineering standards. 8 hours

**Reference Books:**

1. DANIEL GALIN, “Software Quality Assurance”, Pearson
2. M G Limaye, “Software Testing”, Tata McGraw Hill

**Teaching-Learning Strategies in brief (4 to 5 sentences)**

1. Providing examples, real life scenarios etc through online references, animation, slide show and video
2. Making groups for peer to peer learning and enabling discussions for motivating coordination and team-player skills
3. Giving them tutorials and topic based presentations for gaining more insights
4. Motivating them for research and product based learning

**Assessment methods and weightages in brief (4 to 5 sentences)**

1. Assessing different groups through presentation and oral questionnaires
2. Assessing through quizzes for better objective evaluation
3. Assessing through sessionals and assignment submission apart from semester examination  
Weightage is given on sincerity, punctuality, timely submissions, improvisations etc.

## MCA PE221 Data Science and Analytics

LTP: 25 75 100 3-1-0 Credits: 4

### Learning Outcome

- CO1: Understand the fundamental concepts of data science
- CO2: Evaluate the data analysis techniques for applications handling large data
- CO3: Demonstrate the various machine learning algorithms used in data science process
- CO4: Understand the ethical practices of data science
- CO4: Apply and Visualize and present the inference using various tools
- CO5: Create and Learn to think through the ethics surrounding privacy, data sharing and algorithmic decision-making

### Mapping:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	3	3	3		2	2	1	1	1
CO2	3	3	3	3	3	3	2	2	2	2	1	1
CO3	3	3	3	3	3				2	1		1
CO4	3	3	3		3	3	2	2			1	1
CO5	3	3		3	3	3	2	2	1			2

### Unit-1 INTRODUCTION TO DATA SCIENCE

8 hours

Definition – Big Data and Data Science Hype – Why data science – Getting Past the Hype – The Current Landscape – Data Scientist - Data Science Process Overview – Defining goals – Retrieving data – Data preparation – Data exploration – Data modeling – Presentation.

### Unit-2 BIG DATA AND ANALYTICS

8 hours

Problems when handling large data – General techniques for handling large data through data analytics – Case study – Steps in big data – Distributing data storage and processing with Frameworks – Case study.

### Unit-3 MACHINE LEARNING

8 hours

Machine learning – Modeling Process – Training model – Validating model – Predicting new observations – Supervised learning algorithms – Unsupervised learning algorithms.

### Unit-4 DEEP LEARNING

8 hours

Introduction – Deep Feedforward Networks – Regularization – Optimization of Deep Learning – Convolutional Networks – Recurrent and Recursive Nets – Applications of Deep Learning.

### Unit-5 DATA VISUALIZATION ETHICS AND RECENT TRENDS

8 hours

Introduction to data visualization – Data visualization options – Filters – MapReduce – Dashboard development tools – Creating an interactive dashboard with dc.js-summary. Data Science Ethics – Doing good data science – Owners of the data - Valuing different aspects of privacy - Getting informed consent - The Five Cs – Diversity – Inclusion – Future Trends.

### **TEACHING - LEARNING STRATEGIES**

1. BLENDED LEARNING
2. BRAINSTORMING
3. CASE STUDY
4. COMPUTER AIDED PRESENTATION
5. COMPUTER LABS/LAPTOP INSTRUCTION
6. DEMONSTRATION
7. DIRECT INSTRUCTION
8. DISCOVERY LEARNING
9. DISCUSSION
10. DRILL AND PRACTICE
11. EXAMINATION
12. FLIPPED CLASS
13. FULLY ONLINE INSTRUCTION
14. GROUP ACTIVITIES
15. INQUIRY

16. LECTURE
17. MENTAL MODELING
18. MOOC ONLINE
19. PROJECT DEVELOPMENT
20. PROJECT PRESENTATION
21. QUESTION AND ANSWER
22. ROLE PLAY
23. SELF-LEARNING
24. SEMINAR
25. TUTORIAL
26. WEB-ENHANCED LEARNING

**Assessment methods and weightages in brief**

5. Internal Assessment: 25
6. Semester Exam: 75  
Assessments through Sessional, Assignments, Quizzes etc.

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA PE222	SOFT COMPUTING	PCC	25	75	100	3-1-0	4

### **Course Objectives:**

- CO1. To Understand the concepts of Neural Networks
- CO2. Discuss the various neural network architectures.
- CO3. To Understand the concept of fuzzy logic.
- CO4. To Discuss the concept of fuzzification and defuzzification.
- CO5. Describe and understand the concept of Genetic algorithm.

#### **Unit-I: Introduction to Neural Networks**

8 hours

Neuron, Nerve structure and synapse, Artificial Neuron and its model, activation functions, Neural network architecture: single layer and multilayer feed forward networks, recurrent networks. Various learning techniques; perception and convergence rule, Auto-associative and hetro-associative memory.

#### **Unit-II: Neural Network Architectures**

8 hours

Architecture: perceptron model, solution, single layer artificial neural network, multilayer perceptron model; back propagation learning methods, effect of learning rule co-efficient; back propagation algorithm, factors affecting backpropagation training, applications.

#### **Unit-III: Introduction to Fuzzy logic**

8 hours

Basic concepts of fuzzy logic, Fuzzy sets and Crisp sets, Fuzzy set theory and operations, Properties of fuzzy sets, Fuzzy and Crisp relations, Fuzzy to Crisp conversion.

#### **Unit-IV: Fuzzy Inference System**

8 hours

Membership functions, interference in fuzzy logic, fuzzy if-then rules, Fuzzy implications and Fuzzy algorithms, Fuzzifications & Defuzzification, Fuzzy Controller, Industrial applications.

#### **Unit-V: Genetic Algorithm (GA)**

8 hours

Basic concepts, working principle, procedures of GA, flow chart of GA, Genetic representations, Initialization and selection, Genetic operators, Mutation, Generational Cycle, applications.

#### **Text Books:**

1. S. Rajsekar & G.A. Vijayalakshmi Pai, "Neural Networks, Fuzzy Logic and Genetic Algorithm: Synthesis and Applications" Prentice Hall of India.
2. N.P. Padhy, "Artificial Intelligence and Intelligent Systems" Oxford University Press.

#### **Reference Books:**

3. Siman Haykin, "Neural Networks" Prentice Hall of India
4. Timothy J. Ross, "Fuzzy Logic with Engineering Applications" Wiley India.
5. Kumar Satish, "Neural Networks" Tata Mc Graw Hill

#### **Course outcomes:**

1. Students must be able to understand the analogy of biological neuron and artificial neuron.
2. Ability to implement various neural network architectures.
3. To Learn the differences between a crisp set and a fuzzy set and to know the importance of fuzzy logic.

4. To Implement the fuzzy inference system to solve a problem.
5. To learn the concept of genetic algorithm.

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

<b>CO5</b>	3	3	3	3	2	-	3	1	-	1	-	3

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA PE223	Neural network and deep learning	PCC	25	75	100	3-1-0	4

## **COURSE OBJECTIVES**

1. To Provide an overview of Artificial Intelligence and Neural Network.
2. Discuss the concept of Machine Learning and various types of learning algorithms.
3. Work with various Neural Network architectures.
4. Discuss the concept of Deep Learning and how to move towards Deep Learning.
5. **Illustrate the working of Deep Learning over various applications.**

### **UNIT - I: Introduction to Neural Network:**

8 hours

Introduction to Artificial Intelligence & Neural Network: Definition, Biological Neuron, Analogy of Biological Neural Network and Artificial Neural Network, Mathematical definition of Neural Network, Model of ANN, Advantages and Benefits of ANN, Features of ANN, Types of activation function, Learning Rate, Synaptic Weights.

Neural Network Architecture: Single Layer Feed Forward NN, Multiple layer Feed Forward NN, Recurrent Neural Network.

### **UNIT – II: Introduction to Machine Learning:**

8 hours

Machine Learning: Definition, types- supervised, unsupervised and reinforcement learning, and Learning process. Learning in ANN: Error Correction Learning, Hebbian Learning, Competitive Learning.

Introduction to Programming with R and python, Data preprocessing

Descending the Right Curve: Interpreting Learning as Optimization, Cost Functions.

Validating Machine Learning: Depicting Learning Curves, Training, testing and validation.

### **UNIT - III: Types of Neural Networks**

8 hours

Single layer perceptron: Least Mean Square Algorithm, Multilayer perceptron: Backpropagation Algorithm, Radial-basis function network, Support Vector Machine, Principal Components Analysis, Self-Organized Maps.

### **UNIT - IV: Introduction to Deep Learning:**

8 hours

Introducing Deep Learning, Machine learning principles, Basics of Deep Learning.

Moving towards Deep Learning: Benefits, Improving Processing Speed, Deep Learning vs other forms of AI, Find Smarter solutions, end to end learning.

Deep learning & Neural Network: Convolution Neural Networks, Recurrent Neural Networks

**UNIT – V: Applications of Deep Learning**

8 hours

Applications and fields requiring Deep Learning, Deep Learning tools.

Interacting with Deep Learning: Image Classification, Advanced CNN, Language Processing, Playing with Reinforcement Learning.

**Course outcomes:**

1. Students must be aware of Artificial Intelligence and Neural Networks
2. Student will have a broad understanding of Machine Learning.
3. Student will be capable of working with neural networks.
4. Student will have a broad understanding of Machine Learning.
5. The student will be able to work on the various deep learning tools and programming platforms to meet the market and research trending demands.

Paper Code	Title of the Paper	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA 301	Formal Languages & Compiler Design	PCC	25	75	100	3-1-0	4

### Course Objectives:

- CO1: To learn the basic techniques that underline the practice of Compiler Construction.
- CO2: To learn about the use of regular expressions and context free grammars in compiler design.
- CO3: To provide a detailed description of the working of a compiler.
- CO4: To learn about each phase of compiler and its application to input programs.
- CO5: To learn run-time environment into which the high-level code is translated.

### Learning Outcomes: Upon successful completion of this course, students will be able to:

- CLO1: Understand the basic concepts of formal languages and their application to Compiler Design.
- CLO2: Get an understanding of the fundamental principles in compiler design.
- CLO3: Understand the process of translating a high-level language to executable code.
- CLO4: Understand and analyze different parsing techniques and algorithms.
- CLO5: Generate intermediate code for statements in the high-level languages.
- CLO6: Understand techniques for code optimization.
- CLO7: **Implement a complete compiler for a small programming language.**

### Unit – I

8 hours

**INTRODUCTION:** Introduction to Translators (interpreter, compiler & cross-compiler), Phases of compilation and overview, Introduction to GCC.

**LEXICAL ANALYSIS (SCANNER):** Regular language, finite automata, regular expression and their applications to lexical analysis, from regular expression to finite

automata, Implementation of lexical analyzers, lexical-analyzer generator, LEX-compiler, Formal grammars and their application to syntax analysis, ambiguity, YACC.

### **Unit – II**

8 hours

**SYNTAX ANALYSIS (PARSER):** Context-free language and grammar

**BASIC PARSING TECHNIQUES:** Parsers, Top-down parsing, Shift reduce parsing, operator grammar, operator precedence parsing, predictive parsers. LL(1) grammar, LR(0), SLR(1),LR(1), LALR(1) grammars and Bottom-up parsing, ambiguity and LR parsing, LALR(1) parser generator (yacc,bison).

### **Unit – III**

8 hours

**SYNTAX-DIRECTED TRANSLATION:** Syntax-directed Translation schemes, Implementation of Syntax directed Translators, Intermediate code, postfix notation, Parse trees & syntax trees, three address code, quadruple & triples, translation of assignment statements, Boolean expressions, statements that alter the flow of control, postfix translation, translation with a top down parser.

### **Unit – IV**

8 hours

**SEMANTIC ANALYSIS:** Attribute grammar, syntax directed definition, evaluation and flow of attribute in a syntax tree.

**SYMBOL TABLE:** Data structure for symbols tables, representing scope information, symbol attributes and management. Run-time environment: Procedure activation, parameter passing, value return, memory allocation, and scope. Error Detection & Recovery: Lexical Phase errors, syntactic phase errors semantic errors.

### **Unit – V**

8 hours

**INTERMEDIATE CODE GENERATION:** Translation of different language features, different types of intermediate codes.

**CODE IMPROVEMENT (OPTIMIZATION):** Analysis: control-flow, data-flow dependence etc., Code improvement local optimization, global optimization, loop optimization, peep-hole optimization

### **TEXTBOOKS**

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA 302	Machine Learning	PCC	25	75	100	3-1-0	4

### Course Objective:

- To learn the concept of how to learn patterns and concepts from data without being explicitly programmed in various IoT nodes.
- To design and analyse various machine learning algorithms and techniques with a modern outlook focusing on recent advances.
- Explore supervised and unsupervised learning paradigms of machine learning.
- To explore Deep learning technique and various feature extraction strategies.
- To extend machine learning for higher understanding and implementation of neural network etc.

### Unit wise Syllabus

#### Unit – I: Supervised Learning

**8 hours**

Supervised Learning (Regression/Classification) - Basic methods: Distance-based methods, Nearest-Neighbours, Decision Trees, Naive Bayes - Linear models: Linear Regression, Logistic Regression, Generalized Linear Models; Support Vector Machines, Nonlinearity and Kernel Methods; Beyond Binary Classification: Multi-class/Structured Outputs, Ranking.

#### Unit – II: Clustering

**8 hours**

JH/CSE/AICTE/CBCS/MTCSE/2019-20 Page 23

Clustering: K-means/Kernel K-means; Dimensionality Reduction: PCA and kernel PCA; Matrix Factorization and Matrix Completion; Generative Models (mixture models and latent factor models).

#### Unit – III: Evaluating Machine Learning

**8 hours**

Evaluating Machine Learning algorithms and Model Selection, Introduction to Statistical Learning Theory, Ensemble Methods (Boosting, Bagging, Random Forests).

#### Unit – IV: Sparse Modeling & Estimation

**8 hours**

Sparse Modeling and Estimation, Modeling Sequence/Time-Series Data, Deep Learning and Feature Representation Learning

#### Unit – V: Scalable Machine Learning

**8 hours**

Scalable Machine Learning (Online and Distributed Learning A selection from some other advanced topics, e.g., Semi-supervised Learning, Active Learning, Reinforcement Learning, Inference in Graphical Models, Introduction to Bayesian Learning and Inference. Recent trends in various learning techniques of machine learning and classification methods for IOT applications

**Course outcome:**

After completion of course, students would be able to:

- Extract features that can be used for a particular machine learning approach in various IOT applications.
- To compare and contrast pros and cons of various machine learning techniques and to get an insight of when to apply a particular machine learning approach.
- To mathematically analyse various machine learning approaches and paradigms.
- To assess the dataset in training and testing category.
- To incorporate deep learning methods using programming languages.

## MCA 303 (DATA WAREHOUSING AND DATA MINING)

### Course Objectives

#### Course Outcomes:

CO1. To develop an understanding of the basic concepts of data warehousing, design, architecture, OLAP in Data Warehousing

CO2. To understand with the Data Mining Primitives, Architecture of Data Mining System

CO3. To understand the concept of Association Rule Mining in Large Databases

CO4: To Understand with the Classification by Decision Tree Induction, Bayesian Classification, Classification by back propagation, Classification Based on Concepts from Association Rule Mining, Other Classification Methods, Prediction

CO5: To understand the concept of Cluster Analysis in Data, Types of Data in Cluster of Analysis. A Categorization of Major Clustering Methods, Mining Complex Types Data

#### Unit-I

**8 hours**

**DATA WAREHOUSING:** Basic concepts in data warehousing, Collecting the requirements of data warehouse, Data Warehouse Architecture, Design, Implementation & Maintenance, OLAP in data warehouse, Data warehousing and the web, Data Cube Technology, From Data Warehousing to Data Mining.

#### Unit-II

**8 hours**

**DATA MINING CONCEPTS:** Data mining primitives, Basics of data mining, Query language, Architectures of data mining system

#### Unit-III

**8 hours**

**MINING ASSOCIATION RULES IN LARGE DATABASES:** Association Rule Mining, Mining Single Dimensional Boolean Association Rules from Transactional Databases, Mining Multilevel Association Rules from Transaction Databases, Mining Multidimensional Association Rules from Relational Databases and Data Warehouses, From Association Mining to Correlation Analysis, Constraint Based Association Mining.

#### Unit-IV

**8 hours**

**CLASSIFICATION AND PREDICTION:** Issues Regarding Classification and Prediction, Classification by Decision Tree Induction, Bayesian Classification, Classification by Back propagation, Classification Based on Concepts from Association Rule Mining, Other Classification Methods, Prediction, Classifier Accuracy.

#### Unit-V

**8 hours**

**CLUSTER ANALYSIS IN DATA MINING:** Types of Data in Cluster Analysis. A Categorization of Major Clustering Methods, Partitioning Methods, Density Based Methods, Grid Based Methods, Model Based Clustering Methods, Outlier Analysis.

**MINING COMPLEX TYPES OF DATA:** Multidimensional Analysis and Descriptive Mining of Complex Data Objects, Mining Spatial Databases, Mining Multimedia Databases, Mining Time Series and Sequence Data, Mining Text Databases.

**Name of the Academic Program: MCA**

**Course Code: MCA PE331 Title of the Course: Distributed Systems**

**L-T-P: 3-0-0**

**Credits: 04**

(L=Lecture hours, T=Tutorial hours, P=Practical hours)

### **COURSE OUTCOMES (COs)**

**(5 to 8 in case 3 or 4 credit courses)**

After completing this Course, the students should be able to

CO-1: Demonstrate knowledge of the basic elements and concepts related to distributed system technologies

CO-2: Apply the knowledge of the synchronization and consistency aspects of distributed systems in real world applications.

CO-3: Explain the main underlying components of distributed systems (such as RPC, security and file systems).

CO-4: Design and implement distributed transactions and gain knowledge of replication models.

CO-5: Evaluate distributed computing models and implement typical algorithms used in distributed systems and distributed applications in cloud infrastructure.

### **Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

<b>CO6</b>	3	3	2	2	3	-	-	2	2	2	2	-

### **Detailed Syllabus:**

**Unit – I: Characterization of Distributed Systems-** Introduction, Examples of distributed Systems, Resource sharing and the Web Challenges.

SYSTEM MODELS: Architectural models, Fundamental Models

**Theoretical Foundation for Distributed System-** Limitation of Distributed system, absence of global clock, shared memory, Logical clocks, Lamport's & vectors logical clocks, Causal ordering of messages, global state, termination detection.

**Distributed Mutual Exclusion-** Classification of distributed mutual exclusion, requirement of mutual exclusion theorem, Token based and non-token-based algorithms, performance metric for distributed mutual exclusion algorithms. 8 hours

**Unit – II: Distributed Deadlock Detection-** System model, resource Vs communication deadlocks, deadlock prevention, avoidance, detection & resolution, centralized dead lock detection, distributed dead lock detection, path pushing algorithms, edge chasing algorithms.

**Agreement Protocols-** Introduction, System models, classification of Agreement Problem, Byzantine agreement problem, Consensus problem, Interactive consistency Problem, Solution to Byzantine Agreement problem, Application of Agreement problem, Atomic Commit in Distributed Database system. **8 hours**

**Unit – III: Distributed Objects and Remote Invocation -** Communication between distributed objects, Remote procedure call, Events and notifications.

**Security -** Overview of security techniques, Cryptographic algorithms, Digital signatures.

**Distributed File Systems -** File service architecture.

**Unit – IV: Transactions and Concurrency Control -** Transactions, Nested transactions, Locks, Optimistic Concurrency control, Timestamp ordering, Comparison of methods for concurrency control. **8 hours**

**Distributed Transactions -** Flat and nested distributed transactions, Atomic Commit protocols, Concurrency control in distributed transactions, Distributed deadlocks, Transaction recovery.

Replication: System model and group communication, Fault - tolerant services, highly available services, Transactions with replicated data.

**Unit – V: Distributed Algorithms -** Introduction to communication protocols, Balanced sliding window protocol, Routing algorithms, Destination based routing, Deadlock free Packet switching, Election algorithm. **8 hours**

**Reference Books:**

1. Singhal & Shivaratri, Advanced Concept in Operating Systems, McGraw Hill.
2. Coulouris, Dollimore, & Kindberg, Distributed System: Concepts and Design, Pearson.
3. Gerald Tel, Distributed Algorithms, Cambridge University Press.

**Teaching-Learning Strategies in brief (4 to 5 sentences)**

Lecture, Discussion, Model Development etc.

**Assessment methods and weightages in brief (4 to 5 sentences)**

Sessional tests, quizzes, assignments etc.

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA PE332	Cloud Computing	PCC	25	75	100	3-1-0	4

### Course Objectives:

- 1: to Gain an overview of the concepts, processes and keywords associated with Cloud computing.
- 2: to learn the cloud types and deployment models and understanding the key drivers of cloud like the concept of virtualization and the barriers associated with its implementation
- 3: to understand the constraints associated with security aspect of Cloud.
- 4: to Understand the best practices that can be adopted for ensuring a secure cloud and how the audit of a cloud works.
- 5: to Identify the risks, compliance, and governance responsibilities and challenges associated with cloud types and services.

CO5	2	2	3	2	2	-	2	-	-	-	-	2
CO6	3	3	2	2	3	-	-	2	2	2	2	-

### Detailed Syllabus:

#### Unit-I: Introduction to cloud computing

Cloud introduction and overview, applications of cloud computing.

**8 hours**

#### Unit-II: cloud computing architecture

Requirements, introduction to architecture, on demand computing virtualization, types of virtualizations, hypervisors, SPI framework, cloud service delivery model

**8 hours**

#### Unit-III: deployment model

Key drivers to adopting model, impact on users, governance in the cloud, types of models: private, public, hybrid, VPN, Barriers in cloud adoption

**8 hours**

#### Unit-IV: Security Management

Trust boundaries, IAM, standards and protocols, security issues, solutions, IAM practices, Recent advancements in cloud and its applications.

**8 hours**

#### Unit-V: audit and compliance

Journal policy, compliance, governance, risks, GRC, Cloud security alliance, auditing the cloud,

**8 hours**

**Text/Reference Books:**

1. William Stallings, "Cryptography and Network Security"
2. Alfred J. Menezes, Paul C. van Oorschot, Scott A. Vanstone, "Handbook Of Applied Cryptography"
3. Charlie Kaufman, Radia Perlman, Mike Speciner, "Network Security: Private Communication in a Public World"

**Course Outcomes:**

CO1: Gained an overview of the concepts, processes and keywords associated with Cloud computing.

CO2: Learnt the cloud types and deployment models and understanding the key drivers of cloud like the concept of virtualization and the barriers associated with its implementation

CO3: understood the constraints associated with security aspect of Cloud.

CO4: Understood the best practices that can be adopted for ensuring a secure cloud and how the audit of a cloud works.

CO5: Identified the risks, compliance, and governance responsibilities and challenges associated with cloud types and services.

## Course Design

### Typical Course Design

Name of the Academic Program - Master of Computer Applications (MCA)

Course Code: MCA PE333 - Title of the Course: Cryptography and Network Security

L-T-P: 3-1-0

Credits: 4

(L=Lecture hours, T=Tutorial hours, P=Practical hours)

#### COURSE OUTCOMES (COs) (5 to 8 in case 3 or 4 credit courses)

After completing this Course, the students should be able to-

CO-1: Understand and demonstrate knowledge related to the basic concepts of security in networking and data transmission.

CO-2: Apply different mathematical concepts related to cryptography.

CO-3: Apply and evaluate different cryptographic techniques.

CO-4: Apply and evaluate different network security protocols.

CO-5: Demonstrate knowledge and apply mechanisms related to network security, internet security and information security.

#### Mapping of Course Outcomes (COs) with Program Outcomes (POs)

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	3	3	-	3	-	-	-	1	1
CO2	3	3	3	3	3	-	3	-	-	-	1	1
CO3	3	3	3	3	3	-	3	-	-	-	1	1
CO4	3	3	3	3	3	-	3	-	-	-	1	1
CO5	3	3	3	3	3	1	3	-	-	-	1	2

**Detailed Syllabus:**

Unit 1: Security Objectives, Security Mechanisms, Security Services, Network security model, Threats, Vulnerabilities, Attacks, Foundations of Cryptography, Steganography, Classical Cryptographic Techniques, Substitution Ciphers and Transposition Ciphers, Simple XOR, One-Time Pads, Block Ciphers and DES. **8 hours**

Unit 2: Mathematical Background, Random Numbers, Random Number Generators Types and Properties, Information Theory, Groups, Rings, Fields, Modular arithmetic, Euclid's algorithm, Finite fields, Polynomial, Prime numbers, Fermat's and Euler's theorem, Testing for primality, Chinese Remainder theorem, Discrete logarithms **8 hours**

Unit 3: Advance Encryption Standard (AES), Triple DES, Blowfish, RC5 algorithm, Message authentication functions, Hash functions, Hash Algorithms, MD5, Secure Hash Algorithm (SHA), Principles of Public-Key cryptosystems, RSA algorithm, Diffie -Hellman, Elgamal Cryptosystem, Public-Key Digital Signature Algorithm Standard. **8 hours**

Unit 4: Key Exchange, Key Management and Distribution Symmetric Key Distribution Using Symmetric & Asymmetric Encryption, Distribution of Public Keys, X.509 Certificates, Public Key Infrastructure, User Authentication Protocols Remote User Authentication Principles, Remote User Authentication Using Symmetric & Asymmetric Encryption, Kerberos. **8 hours**

Unit 5: Network & Internet Security, IP Security, Electronic Mail Security, Privacy Enhanced Mail (PEM), Pretty Good Privacy (PGP), Public-Key Cryptography Standards (PKCS), Web Security, System Security, Firewalls, IDS, IPS, Standards and Governing Bodies (National Security Agency (NSA), National Institute of Standards and Technology (NIST). **8 hours**

**Reference Books:**

1. William Stallings, "Cryptography and Network Security"
2. Alfred J. Menezes, Paul C. van Oorschot, Scott A. Vanstone, "Handbook Of Applied Cryptography"
3. Charlie Kaufman, Radia Perlman, Mike Speciner, "Network Security: Private Communication in a Public World"

**Teaching-Learning Strategies in brief (4 to 5 sentences)**

1. Providing examples, real life scenarios etc through online references, animation, slide show and video
2. Making groups for peer to peer learning and enabling discussions for motivating coordination and team-player skills
3. Giving them tutorials and topic based presentations for gaining more insights

4. Motivating them for research and product based learning

**Assessment methods and weightages in brief (4 to 5 sentences)**

1. Assessing different groups through presentation and oral questionnaires
2. Assessing through quizzes for better objective evaluation
3. Assessing through sessionals and assignment submission apart from semester examination
4. Weightage is given on sincerity, punctuality, timely submissions, improvisations etc.

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA SEE311	Android Programming	PCC	25	75	100	3-1-0	4

### Course Objectives:

- 1: Understanding of the Fundamentals of Android Operating Systems,
- 2: Install and Configure Android Application Development Tools to Write, Compile, Run, and Test Android Software Programs,
- 3: Design and Develop User Interfaces for the Android Platform,
- 4: Apply Java Programming Concepts to Android Application Development,
- 5: Ability to Debug Programs Running on Mobile Devices and Deploy Software to Mobile Devices.

### Unit 1:

Basics of Object-Oriented Programming: Encapsulation, Abstraction, Polymorphism and Inheritance; Basics of Java Programming: Using Variables, Flow Controls, Loops, Arrays and Matrices, Working with Strings, Exceptions in Java, ArrayList and Collections, Enums, Static Variables and Methods, Inner Classes, Basic Threading, Timers, UI, Working with SWT, UI Events.

### Unit 2:

Basics of XML: Introduction, Tree, Syntax, Elements, Attributes, Namespaces, Display, HttpRequest, Parser, DOM, XPath, XSLT, XQuery, XLink, Validator, DTD, Schema, and Server; Setting up Android IDE, Android SDK, Basics of Android Studio: Project Configuration, Screens & Basic Layouts, First Android App: How to Run and Debug with Emulator.

### Unit 3:

Basic concepts of Android: Activities, Menus, Fragments, Intents, Widgets, Contexts, UI Components: View and ViewGroup, Toast, TextView, Buttons, Radio Buttons etc., User Interaction & Screen Navigation, Dialogs, Permissions, Working with Files, Working with the Network, Debugging Android apps.

### Unit 4:

Advanced Concepts of Android: Providing feedback to the user with Sensors: Vibration, Sounds, Flash; Raw camera usage, Touch gestures; Location and Maps, Status Bar Notifications, WebView, Localization, Services.

### Unit 5:

Animations, 2D graphics, 3D graphics and OpenGL, SOAP and REST Overview, Working with SOAP, Working with REST, Google Maps, Monetizing Apps, Ads, Publishing and Uploading App to Google Play

**Course Outcomes:**

At the end of this course, students will be able to:

- CO1:** Identify various concepts of Android programming,
- CO2:** Critique Android applications on their design pros and cons,
- CO3:** Utilize rapid prototyping techniques to design and develop sophisticated mobile interfaces for Android operating system,
- CO4:** Program Android applications with the knowledge of Java programming concepts that use basic and advanced phone features, and
- CO5:** Test and deploy applications to the marketplace for distribution.

**Text Books:**

1. John Horton, “Android Programming for Beginners”, PACKT Publishing
2. Ian Darwin, “Android Cookbook: Problems and Solutions for Android Developers”, O’Reilly Media, Inc.
3. David Griffiths and Dawn Griffiths, “Head First Android Development: A Brain-Friendly Guide”, O’Reilly Media, Inc.

**Reference Books:**

- R1. Lauren Darcey and Shane Conder, “Android Wireless Application Development”, Pearson Education, 2nd ed. (2011)

CO5	3	3		3	3	3	2	2	1			2

## MCA SEE312 (Linux and Unix Programming)

### Course Objectives:

1. To learn how to use UNIX/Linux resources and to find additional information about UNIX/Linux commands.
2. To learn organizing and managing files within the UNIX/Linux file system
3. To learn organizing and managing various processes within UNIX/Linux
4. Learn the concept of Shell scripting and design scripts to do basic tasks.
5. Learn the C Unix Linux Interface and do the programming for processes and files.

### Unit I

**8 hours**

A brief history of LINUX. Architecture of LINUX. Features of LINUX. Introduction to vi editor. Commands like Linux commands- PATH, man, echo, printf, script, passwd, uname, who, date, pwd, cd, mkdir, rmdir, ls, cp, mv, rm, cat, more, wc, grep, etc.

### Unit II

**8 hours**

**Introduction to Shells:** Linux Session, Standard Streams, Redirection, Pipes, Tee Command, Command Execution, Command-Line Editing, Quotes, Command Substitution, Job Control, Aliases, Variables, Predefined Variables, Options, Shell/Environment Customization.

**Filters:** Filters and Pipes, Concatenating files, Display Beginning and End of files, Cut and Paste, Sorting, Translating Characters, Files with Duplicate Lines, Count Characters, Words or Lines, Comparing Files. Input/output redirection.

### Unit III

**8 hours**

**Shell programming:** read and echo, Variables, keywords, logical operations, expressions.

**Control statements:** Taking decisions: if-then-fi, if-then-else-fi, test, case...esac. Loops: while, for, until, break. Nested statements.

### Unit IV

**8 hours**

**Process and Signals:** Process, process identifiers, process structure: process table, viewing processes, system processes, process scheduling, starting new processes: waiting for a process, zombie processes, orphan process, fork, vfork, exit, wait, waitpid, exec, signals functions, unreliable signals, interrupted system calls, kill, raise, alarm, pause, abort, system, sleep functions, signal sets. File locking: creating lock files, locking regions, use of read and write with locking, competing locks, other lock commands, deadlocks.

### Unit V

**8 hours**

**Inter Process Communication:** Pipe, process pipes, the pipe call, parent and child processes, and named pipes: fifos, semaphores: semget, semop, semctl, message queues:

msgget, msgsnd, msgrcv, msgctl, shared memory: shmget, shmat, shmdt, shmctl, ipc status commands.

**Introduction to Sockets:** Socket, socket connections - socket attributes, socket addresses, socket, connect, bind, listen, accept, socket communications.

**TEXT BOOKS:**

1. UNIX SHELL PROGRAMMING (1996) by Yashavant Kanetkar
2. W. Richard. Stevens (2005), Advanced Programming in the UNIX Environment, 3 rd edition, Pearson Education, New Delhi, India.
3. Unix and shell Programming Behrouz A. Forouzan, Richard F. Gilberg.Thomson

**REFERENCES:**

1. Linux System Programming, Robert Love, O’Reilly, SPD.
2. UNIX Network Programming, W.R. Stevens, PHI. UNIX for Programmers and Users, 3rd Edition, Graham Glass, King Ables, Pearson Education

**Learning Outcomes:**

1. Comfortably use basic UNIX/Linux commands from the command line (from a terminal window).
2. Usefully combine UNIX/Linux tools using features such as filters, pipes, redirection, and regular expressions.
3. Customize the UNIX/Linux working environment.
4. Be knowledgeable enough about basic UNIX/Linux shell scripting to be able to successfully read and write bash shell scripts.
5. Should be able to use C Unix Linux interface for programming.

**Mapping:**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

**Teaching-Learning Strategies in brief**

TEACHING - LEARNING STRATEGIES

1. BLENDED LEARNING
2. BRAINSTORMING
3. CASE STUDY
4. COMPUTER AIDED PRESENTATION
5. COMPUTER LABS/LAPTOP INSTRUCTION
6. DEMONSTRATION
7. DIRECT INSTRUCTION

8. DISCOVERY LEARNING
9. DISCUSSION
10. DRILL AND PRACTICE
11. EXAMINATION
12. FLIPPED CLASS
13. FULLY ONLINE INSTRUCTION
14. GROUP ACTIVITIES
15. INQUIRY
16. LECTURE
17. MENTAL MODELING
18. MOOC ONLINE
19. PROJECT DEVELOPMENT
20. PROJECT PRESENTATION
21. QUESTION AND ANSWER
22. ROLE PLAY
23. SELF-LEARNING
24. SEMINAR
25. TUTORIAL
26. WEB-ENHANCED LEARNING

**Assessment methods and weightages in brief**

1. Internal Assessment: 25
  2. Semester Exam: 75
- Assessments through Sessional, Assignments, Quizzes etc.

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA SEE 313	Asp .net Programming	PCC	25	75	100	3-1-0	4

### **Course Objective:**

1. Explain the architecture of Dot Net platform
2. Develop Simple Web form using various controls and implement the concept of master page
3. Develop interaction of front end with database using facilities of .NET platform
4. Deploy .Net Web Application
5. Understanding ADO .Net

### **Unit – I**

**Introduction to .NET Framework and ASP.NET:** State the components of Framework and describe CLR, Microsoft .NET framework Overview, .Net framework Architecture, .Net Framework components, Client-Server architecture, Basics of ASP.NET , Differences between ASP.NET and Classic ASP 1.2.3 Web Applications, Develop applications using ASP.NET IDE, Introduction to Visual Studio, Creating a New Web Project (ASP.NET), Building Web Sites, Set up of work environment, start page, the menu system, toolbars, the new project dialog box, graphical designer, code designer.

### **Unit – II**

**ASP.NET Web Forms 2:** Develop simple web page using built in Objects, Adding Controls to the Web Page, Types of ASP.NET , Page Life Cycle , ASP.Net In-Built Objects (Response, Request, Server, Trace Objects)

Use controls available with the IDE platform of ASP.NET for given purpose, Web Server Controls (Button, Check Box, Check Box List, Drop Down List, HyperLink, Image, Controls Image Button, Label, Link Button, List Box, List Item, Panel, Place Holder, Radio Button, Radio Button List, Text Box)

Working with Control Properties and Events, Validation Controls

### **Unit – III**

**Styles, Themes and Master pages:** Apply Styles, themes and Master pages in ASP.NET Web applications, How Themes Work, Creating Multiple Skins for the Same Control, How Master page and Content pages are connected

### **Unit - IV**

**ASP.NET State Management:** Session management and user's preference in ASP.NET, State Management, View State, The Query String, Cross-Page Posting and Validation, Cookies , Session State, Application State, Application Events, ASP.NET Configuration, The Web.config File

### **Unit – V**

**Connecting Database Using ADO.NET:** Describe Objects of ADO.NET, Describe the use of Data Binding to bind different, ADO.NET Architecture, DataProvider, Connection Object, Command Object ,DataReader, Differentiate between single value and repeated value types

of data binding, DataAdapter Object, DataSet, DataView, Data Binding, Types of data binding, SQL Data Source, Selecting, Updating and Deleting Records

**TEXT BOOKS**

- ASP.NET: The Complete Reference Books Matthew Macdonald McGraw Hill education

**REFERENCE BOOKS**

- Programming in Visual Basic. NET Julia Case Bradley, Anita C. Millspaugh McGraw Hill, latest edition

**Course outcomes:**

Upon successful completion of this course, students will be able to

1. Develop applications using ASP.NET IDE  
Develop simple web page using built in Objects
2. Use controls available with the IDE platform of ASP.NET for given purpose
3. Apply Styles, themes and Master pages in ASP.NET Web applications
4. Develop programs using session management and user's preference in ASP.NET
5. Describe Objects of ADO.NET.

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA OE 311	E-GOVERNANCE AND SMART CITIES	PCC	25	75	100	3-1-0	4

### **COURSE OBJECTIVES:**

- 1.To understand latest technologies used in intelligent building.
- 2.To understand process of planning and drafting a plan for smart city.
- 3.To understand the importance of different smart system
- 4.Gain a familiarity with the basic concepts, terminology and technology of e-governance and Smart cities
- 5.To know different e-governance models and smart cities
- 6.Develop skills to critically evaluate government web sites and eservices against current best practice” principles and standards

### **COURSE OUTCOMES:**

After studying this subject student will be able to:

- Acquaint knowledge on smart cities planning and development
- Develop work break down structure, scheduling and project management of smart cities
- Work out the most energy efficient technique
- Student will be able to understand technologies, infrastructure, and concept of planning and latest methodology.
- Evaluate govt. web sites as per the state of the art practices.

### **Unit - I**

#### **Introduction to Smart cities and E-Governance**

Understanding smart cities, Principle stakeholders, key trends in smart cities developments, Introduction to E-Governance, Difference between Smart cities and E-Governance; Benefits of Smart cities; Evolution, Scope and Content of E-Governance; Present Global Trends of Growth in E-Governance,

### **Unit - II**

#### **Models of E-Governance**

Introduction; Model of Digital Governance: Broadcasting / Wider Dissemination Model, Critical Flow Model, Comparative Analysis Model, Mobilization and Lobbying Model, Interactive – Service Model / Government-to-Citizen-to-Government Model (G2C2G)

### **Unit - III**

#### **Green building in smart cities**

Introduction to green buildings, Rating system, Energy saving system, Dimension of smart cities, Global Standards and performance benchmarks, Smart city planning and development , Financing smart cities development , Governance of smart cities

### **Unit - IV**

#### **Project management in Smart Cities**

Stages of project and work break down Structure , Project organization structure, Planning, Scheduling and CPM ,Project cost analysis, resource allocation & leveling, Line of balancing technique ,Project monitoring and control, Project risk management.

## Unit - V

### Practical's/ Tutorials

Smart material associated with smart building, Technology involved in different construction of smart building, Model preparation on smart city, Case study on ITS, Case study on smart city

### TEXTBOOKS

**Name of the Academic Program - Master of Computer Applications (MCA)**

**Course Code: MCA OE312**

**Title of the Course: Cyber physical system and IoT**

**L-T-P: 3-1-0**

**Credits: 4**

(L=Lecture hours, T=Tutorial hours, P=Practical hours)

**COURSE OUTCOMES (COs)**  
**(5 to 8 in case 3 or 4 credit courses)**

After completing this Course, the students should be able to-

CO-1: Understand and apply the basic concepts related to evolution of distributed computing over the Web.

CO-2: Describe and illustrate the core architectural aspects of IoT network.

CO-3: Demonstrate and apply the knowledge of Cloud Computing, Internet of Everything and their distributed applications.

CO-4: Evaluate the basic concepts and layered architecture of Cyber Physical Systems.

CO-5: Create and apply framework for security and privacy in IoT, CPS and Industry 4.0 and different CPS applications in real world.

**Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>CO1</b>	3	3	3	3	3	-	2	-	1	-	3	3
<b>CO2</b>	3	3	3	3	3	1	2	-	-	-	3	3
<b>CO3</b>	3	3	3	3	3	1	2	1	-	-	3	3
<b>CO4</b>	3	3	3	3	3	1	2	-	-	1	3	3
<b>CO5</b>	3	3	3	3	3	1	2	-	-	-	3	3

**Detailed Syllabus:**

Unit 1: Introduction to IoT. Definition of IoT. Why use IoT. Evolution and Importance of IoT. Web 3.0. Ubiquitous Computing and IoT. Applications of IoT. Privacy and Security issues. Pillars of IoT - Horizontal, Verticals, and Four Pillars, The internet of devices, objects, transducers, and controllers **8 hours**

Unit 2: Web of Things vs. Internet of Things. IoT Standardization. Standardization protocols. Issues with IoT Standardization. Cloud Computing. Cloud of Things. IoT vs Cloud Computing. Middleware for IoT **8 hours**

Unit 3: Introduction to CPS – Definition of CPS. Key features of cyber physical systems. Requirements of CPS. Models of CPS. CPS Architecture and CPS Ecosystem. **8 hours**

Unit 4: Platform components, CPS implementation issues, Intelligent CPS, Secure Deployment of CPS. Security objectives in CPS. Privacy issues and challenges in CPS. **8 hours**

Unit 5: CPS in the real world. CPS in real world and its applications. Case study of CPS applications, Smart City, Power grid control, monitoring applications etc. **8 hours**

**Reference Books:**

3. Honbo Zhou, “The Internet of Things in the Cloud”, CRC Press
4. Rajeev Alur, “Principles of Cyber Physical Systems
5. Sheng-Lung Peng, Souvik Pal, Lianfen Huang, “Principles of Internet of Things (IoT) Ecosystem: Insight Paradigm”, Springer

**Teaching-Learning Strategies in brief (4 to 5 sentences)**

5. Providing examples, real life scenarios etc through online references, animation, slide show and video
6. Making groups for peer to peer learning and enabling discussions for motivating coordination and team-player skills
7. Giving them tutorials and topic based presentations for gaining more insights
8. Motivating them for research and product based learning

**Assessment methods and weightages in brief (4 to 5 sentences)**

4. Assessing different groups through presentation and oral questionnaires
5. Assessing through quizzes for better objective evaluation
6. Assessing through sessionals and assignment submission apart from semester examination
7. Weightage is given on sincerity, punctuality, timely submissions, improvisations etc.

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MCA OE313	Sustainable Development and Green Computing	PCC	25	75	100	3-1-0	4

### Course Objectives:

- To have an elementary knowledge and awareness about sustainability.
- To understand sustainable development goal and how few basic approaches to achieve it
- To learn the fundamentals of Green Computing
- To understand the issues related with green compliance.
- To analyze the Green computing Grid Framework.

### Detailed Syllabus:

#### Unit I:

Sustainability: definition, mission and motives. Need of the sustainability. Issues in achieving sustainable environment.

#### Unit II:

UNESCO sustainable goals (SG). Policies and technological approaches for achieving SG1 to SG 17.

#### Unit III:

Green IT Fundamentals: Business, IT, and the Environment – Green computing: carbon footprint, scoop on power – Green IT Strategies: Drivers, Dimensions, and Goals – Environmentally Responsible Business: Policies, Practices, and Metrics.

#### Unit IV:

Socio-cultural aspects of Green IT – Green Enterprise Transformation Roadmap – Green Compliance: Protocols, Standards, and Audits – Emergent Carbon Issues: Technologies and Future.

#### Unit V:

Virtualization of IT systems – Role of electric utilities, Telecommuting, teleconferencing and teleporting – Materials recycling – Best ways for Green PC – Green Data center – Green Grid framework.

### Course Outcomes:

Students would have –

- Understood need of sustainable development
- Understood what are sustainable development goals and how these goals can be achieved.
- acquired knowledge to adopt green computing practices to minimize negative impacts on the environment.
- Acquired knowledge about the issues related to green compliance.
- Evaluated technology tools that can reduce paper waste and carbon footprint by the stakeholders.
