Reports on Induction Program of School of Engineering Sciences & Technology 2018-2021: Jamia Hamdard has made a significant space for itself in research and education fields in India as revealed by its consistent NIRF ranking of every year. School of Engineering Sciences & Technology (SEST) took the roots of its foundation after the inception of the University. Under the dynamic leadership of Afshar Sir SEST has acquired prominence in university endeavors attracting talents from all over the country including foreign nationals to pursue research, education and excellence in the field of Computer Science, Computer Engineering, Information & Communication Technology, Electronics & Communication Engineering and Bioinformatics. In 49th meeting of AICTE, held on 14th March 2017, AICTE approved a package of measures for further improving the quality of technical education in the country. This 3-week mandatory Student Induction Program (SIP) based on Universal Human Values (UHV) is one of these key measures. Induction programme for newly admitted students is conducted in line with AICTE/UGC Induction programme policy, every year before the commencement of the first semester classes. The SIP is intended to prepare newly admitted undergraduate students for the new stage in their life by facilitating a smooth transition from their home and school environment into the college and university environment. Induction programme helps students to open up, think creatively and become responsible and independent students. This programme was launched by AICTE 5 years back with the idea to help the newly joined students in making them feel comfortable, allow them to explore their academic interests and activities, reduce competition and make them work for excellence, promote bonding within them, build relations between teachers and students, give a broader view of life, and build character. Since its inception Jamia Hamdard has been conducting it every year without a missing. The year 2018 was the year of inception of student Induction Program by SEST. It was inaugurated by Prof Ranjit Biswas, Dean SEST and Prof. M.Afshar Alam, Head, Department of CSE. 3 week program was conducted between 1-21<sup>st</sup> August 2018. The program included varieties of programs like invited lectures, competitions for students, guided tour etc. 2019 saw the Induction program from 1-21<sup>st</sup> August 2019. The program was inaugurated by Prof. M.Afshar Alam, Dean SEST. 3 week program saw various special lectures on varieties of topics ranging from e-governance, human values, big data, scholarships information etc. Besides number of activities related to games, cultural activities were conducted too. Also, the tour of campus along with new

students was conducted along with faculty to show availability of numerous services by the university. Many competitions like poem, singing, poster making etc were also conducted.

Come 2020, Covid Pandemic had hit severely the entire world but not our ever raising dreams. This induction program for first time moved from being offline to online mode as e-SIP. Besides that students participated very enthusiastically and without giving it a miss. It was a huge success. Number of events and competitions were conducted during e-SIP from 9-20<sup>th</sup> NOVEMBER 2020.

In 2021, online induction program was inaugurated by Prof. M. Afshar Alam Vice Chancellor Jamia Hamdard followed by series of invited lectures in Week 1 by faculties of the Department on topics like: Unnat Bharat Abhiyan at Jamia Hamdard, Current trends in Computer Science Invited Lecture, Introduction to Data Science, Advances in Machine Learning, Applied Machine Learning, The role of Telemedicine in post Covid era, Evolution of Generation from 1G-5G, Universal Human Values, Save Ozone, Save Earth, Importance of Mathematics in Engineering Field, Artificial Intelligence as Employment for NextGen, Career opportunities for computer science students: Research and publication Perspective. Week 2 witnessed fun filled student related activities Open Mic, Music, Poetry, Instrumental Skills, and Instagram Reel Competition by Women Cell, IEEE Society and Epoch Group. It was followed by last week which included alumni interact program by students of the Department like Aadil Rehman, Kushagra, Anjali and Danish of B.Tech Batch 2020 passout who are now working in TCS, Sapient, Infosys, Genpact etc.

Reports on Induction Program 2021-22 for MPT, MOT, BPT and BOT in Dept of Rehab Sciences: The Induction Programme is being organised for the newly admitted students to the courses MPT, MOT, BPT and BOT in Dept of Rehab Sciences. On 23rd December 2021, Time: 11:00 am to 12:20 pm )Rehabilitation Science is an integrated science dedicated to the study of human function and participation and its relationship to health and well-being. Fields of study encompassed within this discipline include: Movement Science & Occupational Science. Rehabilitation Science is an interdisciplinary field that focuses on human function and disability. Enhancing physical and psychosocial functioning, participation in life situations, and quality of life of people with disabilities. The Department of Rehabilitation Sciences has been conducting the post graduate programmes since 1998 and undergraduate programmes since 2001.The PhD programme commenced from 2017. The Department of Rehabilitation sciences is well equipped with modern infrastructure. The Department has well reputed faculties with higher specializations in different fields of Physiotherapy and Occupational Therapy. Occupational therapy (OT) is a branch of health care that helps people of all ages who have physical, sensory, or cognitive problems. ... Occupational therapists help with barriers that affect a person's emotional, social, and physical needs. To do this, they use everyday activities, exercises, and other therapies. Occupational therapy (OT) teaches you how to adapt. It can help you perform any kind of task at school, work, or in your home. You'll learn how to use tools (you may hear them called assistive devices) if you need them. You'll meet with a health professional called an occupational therapist who can come up with ways to change your movements so you can get your work done, take care of yourself or your

home, play sports, or stay active. Physiotherapists help people affected by injury, illness or disability through movement and exercise, manual therapy, education and advice. They maintain health for people of all ages, helping patients to manage pain and prevent disease. A physiotherapist works with patients to develop customized programs designed to restore as much as possible their functional ability and movement. The job prospects for graduate and postgraduate students of Occupational Therapy and Physiotherapy have been very good with 100 % job placement. Many of our alumni are holding responsible positions in government and private institutes nationally and internationally. Students are in great demand for jobs in abroad and many of them are pursuing advance studies as well. The Department also offers campus placements to the students. Well reputed NGOs and Clinics visit the department for campus placements. In addition to academics, students of Rehabilitation sciences have shown their excellence in extracurricular activities and sports as well.

Reports Year 2017-22:
