

Hack Club is a global nonprofit organisation building a network of high school makers and student-led coding clubs. **Hack Club** was formed in 2014 with the goal of bringing computer science education to every school with a **by- the-students, for-the-students** model. Hundreds of potential club leaders apply to Hack Club each year.

HackClub Jamia Hamdard's vision is to create the coding culture, which is more likely to solve some real world issues, and convert your codes into some valuable piece of art.

It was formed on 4th April, 2022 and has built a huge network of **500+** students

within the college in a very short period of time. The Team is offering project based learning, doubt classes and of course some better network, as the saying goes, '**Your network is your Net Worth**'. Hack Club Jamia Hamdard is working on overall development of your ideas and innovation.

Keypoint

- 15+ team projects
- 500+ student network
- 10+ hackathons participation
- 6+ mentoring domains
- 20+ companies network

Highlights

- Inauguration Function
- Solana Campus Connect
- World of Web 3.0
- Innovation in SemiConductor
